Question 1

A company uses Microsoft 365 for email. The company plans to implement a solution for employees who leave the company

Currently, user Accounts of terminated employees are deleted immediately. Mailbox content for terminated employees must be retained for 90 days and then deleted.

You need to identify solutions that meet the requirements.

What are two possible ways to achieve this goal? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

Options:

A- Apply a retention policy to the mailbox.

B- Recover the inactive mailbox.

C- Restore the inactive mailbox.

D- Apply a Litigation Hold to the mailbox.

Answer:

B, D

Question 2

You are a company's Microsoft 365 administrator.

You need to retrieve the following information:

an assessment of your tenant's security status for a given regulation

a list of audit and assessment reports on Microsoft's cloud services

Which two portals have this information? Each correct answer presents a partial solution.

NOTE: Each correct selection is worth one point.

Options:

A- Service Trust Portal

B- Azure portal

C- Compliance Center

D- SharePoint admin center

Answer:

A, C

Explanation:

Question 5

Question Type: MultipleChoice

A company deploys Microsoft 365.

The company plans to use sensitivity labels.

You need to identify the capabilities of sensitivity labels.

What are three capabilities of sensitivity labels? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

Options:

A- Sensitivity labels can be customized.

B- Sensitivity labels can ensure that a document is retained indefinitely.

C- Sensitivity labels can trigger disposition reviews.

D- Sensitivity labels can be used to encrypt documents.

E- Sensitivity labels can automatically be applied to documents.

Answer:

A, D, E

Explanation:

With sensitivity labels you can classify and help protect your sensitive content. Protection options include labels, watermarks, and encryption.

Question 6

Question Type: **MultipleChoice**

A company plans to deploy a solution to manage its Windows 10 computers. Some computers are connected to the corporate network and some computers are connected to the internet,

The solution must meet the following requirements:

Deploy an operating system to the computers.

Join the computer to an on-premises Active Directory domain.

Install Windows updates to the computers.

You need to identify a solution that meets the requirements.

Which solution should you choose?

Options:

A- Microsoft Endpoint Manager

B- Microsoft Intune

C- Windows Autopilot

D- Configuration Manager

Answer:

A

Explanation:

Endpoint Manager includes the services and tools you use to manage and monitor mobile devices, desktop computers, virtual machines, embedded devices, and servers. Endpoint Manager combines services, including Microsoft Intune, Configuration Manager, Desktop Analytics, co-management, and Windows Autopilot.
