Question 1

Question Type: MultipleChoice

A customer needs to deploy 5000 virtual desktops on Nutanix. The requirements call for an active /active deployment, such that an entire site can be made unavailable due to maintenance or disaster without impacting desktop availability. What is the minimum number of nodes necessary to meet the customer's requirements?

Options:

A- 13

B- 26

C- 52

D- 104

Answer:

C

Question 2

Question Type: MultipleChoice

During an initial discussion, a prospective customer indicates they are strongly considering vSAN for their HCI initiative. The prospect's workloads are mostly read-intensive and they have over 1PB of archival data

a. The prospect expects to save on costs using storage efficiencies that their existing platform does not support. Which two Nutanix differentiators should the systems engineer discuss? (Choose two.)

Options:

- A- Compression on Hybrid Nodes
- B- Volume Group Load Balancing
- C- Data Locality
- D- CVM Autopathing

Answer:

A, C

Question 3

Question Type: MultipleChoice

An 8-node hybrid cluster is configured with a Fault Tolerance level of 2 (RF3). All nodes are identical. Which simultaneous failures will result in VM data being unavailable?

Options:

- A- Two HDD failures on one node and a single SSD failure on another node
- B- Single SSD failure on one node and a single SSD failure on another node
- C- SSD failures on two nodes and a CVM powered off on another.
- D- CVM being powered off on one node and two HDD failures on another node.

Answer:

C

Question 4

Question Type: MultipleChoice

what information can be gathered about the configuration of the VM storage?

Options:

- A- Majority of VMs are Thin Provisioned.
- B- Storage capacity is a problem
- C- VMs have many disks.
- D- Total disk usage is high

Answer:

A

Question 5

Question Type: MultipleChoice

One of a prospective customer's security analysts asks about Nutanix's security functionality. The security analyst asks if Nutanix has any feature or capability that reduces the effort required to assess the security within the Nutanix infrastructure. Which benefit does Nutanix SCMA provide to this prospect?

Options:

- A- Automatically updates/patches cluster components to the latest code levels
- B- Enables One-Click remediation of non-compliant security settings
- C- Notifies the customer of newly discovered/announced vulnerabilities
- D- Automates security compliance checking and remediation

Answer:

D

Question 6

Question Type: MultipleChoice

Which AOS feature provides enhanced read performance specifically for virtual desktop environments?

Options:

- A- Data Locality
- B- Time Stream
- C- Shadow Clones

D- Copy on First Write

Answer:

C

Question 7

Question Type: MultipleChoice

30. A healthcare prospect looking to refresh their infrastructure with Nutanix has an initiative to migrate 5 Petabytes of unstructured, archived patient data

a. Which Nutanix product should be the focus of the discussion?

Options:

A- Mine

B- Files

C- Volumes

D- Objects

Answer:

D

Question 8

Question Type: MultipleChoice

A customer wants to decrease costs and increase efficiency by eliminating NAS silos and adopting a cloud-like mindset. Which Nutanix product meets these requirements?

Options:

A- Nutanix Calm

B- Nutanix Xi Frame

C- Nutanix Files

D- Nutanix Beam

Answer:

C
