## Question 1

---

**Question Type:** MultipleChoice

---

The Service Discoverability principle is primarily concerned with increasing the \_\_\_\_\_ of the information published about a service. Select the correct answer.

### Options:

---

- A- complexity ratio
- B- scalability ratio
- C- communications quality
- D- linear quality

### Answer:

---

C

## Question 2

---

**Question Type:** MultipleChoice

---

When applying the Service Loose Coupling principle \_\_\_\_\_ coupling types are avoided in order to \_\_\_\_\_ the governance independence of the service. Select the correct answer.

**Options:**

---

- A- positive, minimize
- B- negative, minimize
- C- negative, maximize
- D- positive, maximize

**Answer:**

---

C

## Question 3

---

**Question Type: MultipleChoice**

---

I have a service that is required to access a shared database. When the load on the database is heavy (for example when the billing department is running reports) my service often times-out and returns a fault to the service consumer. Which service-orientation principle should I apply to address this problem? Select the correct answer.

**Options:**

---

- A- Service Loose Coupling
- B- Service Discoverability
- C- Service Autonomy
- D- Service Reusability

**Answer:**

---

C

## Question 4

---

**Question Type:** MultipleChoice

---

Which of the following are considered negative forms of coupling: SELECT ALL THAT APPLY?

**Options:**

---

- A- Logic-to-Contract
- B- Contract-to-Logic
- C- Contract-to-Technology
- D- Contract-to-Implementation

**Answer:**

---

B, C, D

## Question 5

---

**Question Type:** MultipleChoice

---

When measuring coupling that exists between a service and a service consumer, you can determine the extent of dependency that exists between the service and service consumer. Select the correct answer.

**Options:**

---

- A- True
- B- False

**Answer:**

---

A

## Question 6

---

**Question Type: MultipleChoice**

---

Which of the following is not a benefit associated with silo-based application design? Select the correct answer.

**Options:**

---

- A-** The emphasis on fulfilling tactical (short-term) business requirements allows for a more predictable application delivery lifecycle.
- B-** The analysis and design of applications are easier because strategic (long-term) business requirements don't usually need to be taken into account.
- C-** The latest technology advancements can be leveraged by repeatedly building new applications from the ground up.
- D-** Applications are always inherently built for repeated reuse across silos.

**Answer:**

---

D

## Question 7

---

**Question Type:** MultipleChoice

---

The composition controller role is most associated with which of the following service models? Select the correct answer.

### Options:

---

- A- task service
- B- entity service
- C- utility service
- D- data service

### Answer:

---

A

## Question 8

---

**Question Type:** MultipleChoice

---

When a service is required to manage and hold onto an excessive quantity of state data, it can lead to a decrease in which of the following desirable service characteristics? SELECT ALL THAT APPLY

**Options:**

---

- A- maintainability
- B- availability
- C- scalability
- D- discoverability

**Answer:**

---

B, C

## Question 9

---

**Question Type:** MultipleChoice

---

Often it is a requirement to wrap a legacy system with a service. This is typically accomplished by encapsulating calls to the legacy system's Application Programming Interface (API) within the core logic of the service. Care must be taken to not expose details of the underlying API through the service contract as it may unintentionally couple the service consumer to the legacy system. Which pair of

service-orientation principles directly addresses this concern? Select the correct answer.

**Options:**

---

- A- Service Loose Coupling, Service Abstraction
- B- Service Statelessness, Service Autonomy
- C- Service Loose Coupling, Service Statelessness
- D- Service Autonomy, Standardized Service Contract

**Answer:**

---

A

## Question 10

---

**Question Type:** MultipleChoice

---

To be considered an enterprise resource a service must be non-agnostic in nature. Select the correct answer.

**Options:**

---

A- True

B- False

**Answer:**

---

B

## Question 11

---

**Question Type: MultipleChoice**

---

Fill in the blank for the following definition for the Standardized Service Contract design principle: "Services within the same \_\_\_\_\_ are in compliance with the same contract design standards." Select the correct answer.

**Options:**

---

A- service activity

B- service inventory

C- state

D- message path

**Answer:**

---

B
