Question 1

Question Type: MultipleChoice

Which two transport types are supported by the ActiveEnterprise Adapter palette? (Choose two.)

Options:

- A- JMS Route transport
- B- Tibrv Reliable transport
- C- Tibrv Network transport
- D- JMS Topic transport
- E- HTTP transport

Answer:

B, D

Question 2

Question Type: MultipleChoice

How is work offered or allocated through instantiations of a dynamic organization?

Options:

- A- Using an LDAP query in a Performer field.
- B- Referencing the dynamic organization identifier from RQL.
- C- Mapping the correct identification process data to the relevant dynamic organization identifier.
- D- Using a Performer field that contains the dynamic organization identifier.

Answer:

C

Question 3

Question Type: MultipleChoice

What can be modified from the TIBCO Designer Startup Panel Administration tab?

Options:

- A- domain membership
- B- user directory
- C- deployment target machine
- D- transition line mode

Answer:

B

Question 4

Question Type: MultipleChoice

You are migrating an application, which includes some custom XPath functions. Which runtime task is needed to make the custom function available?

Options:

- A- Include the XPath function plug-ins in your application.

- B-** Export the XPath function as a zip, and import it through BusinessStudio.
- C-** Export the XPath function as a jar, and update the bwagent path.
- D-** Include the custom XPath function plug-ins into the Host repository.

Answer:

A

Question 5

Question Type: MultipleChoice

Which statement is true about changing the log-level of an engine?

Options:

- A-** It is changed by restarting the engine with a different -debugLevel argument.
- B-** It is changed by modifying the bwengine.xml file, which is periodically re-read by the engine.
- C-** It is changed from the TIBCO Administrator by selecting the appropriate role(s).
- D-** It is changed from the TIBCO Administrator by re-deployment of the engine.

Answer:

C

Question 6

Question Type: MultipleChoice

Which three are valid archives in TIBCO ActiveMatrix BusinessWorks? (Choose three.)

Options:

- A- Process Archive
- B- Enterprise Archive
- C- Adapter Archive
- D- Hawk Archive
- E- Event Archive

Answer:

A, B, C

Question 7

Question Type: MultipleChoice

When filtering on text attributes, what would "s*s" return?

Options:

- A- anything beginning with 's' and ending with 's'
- B- anything beginning and ending with upper or lower case 's'
- C- only text of three characters beginning or ending with upper or lower case 's'
- D- only text of three characters beginning with 's' and ending with 's'

Answer:

A

Question 8

Question Type: MultipleChoice

Which three statements are correct about Rendezvous secure daemon (RVSD)? (Choose three.)

Options:

- A-** The RVSD startup is exactly same as RVD without using any store file. However, RVSD supports secure transport connections defined through API calls.
- B-** The Rendezvous daemon (RVD) can start either automatically or by explicit command. In contrast, administrators must start RVSD by explicit command.
- C-** During RVSD startup, you need to specify the store file, which contains the security parameters that configure RVSD.
- D-** The Rendezvous daemon (RVD) can be stopped automatically by configuration after an interval in which it has no clients. In contrast, RVSD does not stop automatically.

Answer:

B, C, D
