Question Type: MultipleChoice

During a design workshop, an architect discovers that a customer plans to deploy Arc GIS and AutoCAD applications to a sub of VDI users. The project will scale to 1500 general purpose desktops, 50 AutoCAD users and 25 ArcGIS users. Planned redundancy must allow one host to be removed from any cluster for maintenance while still accomodating all users.

Desktops will be configured for each of the user groups:

- * General purpose - 2vCPU, 2GB RAM, 40GB HOD, Windows 7
- * AutoCAD - 4vCPU, 16GB RAM, 200GB HOD, Windows 7
- * ArcGIS - 4vCPU, 8GB RAM, 500GB HOD, Windows 10

Referring to the exhibit, which two cluster configurations are recomended to support these desktop pools? {Choose two.}

Question 3

Question Type: MultipleChoice

A customer wants to securely deliver applications. They have given these requirements to an architect:

- * 1,100 corporate users
- * Applications run on Windows
- * Confidential data must remain inside the datacenter at all times

- * Datacenter has a firewall separating it off from the corporate LAN
- * Security team policy will NOT allow a corporate LAN subnet through the firewall to a datacenter subnet (example: source 172.16.30.0 /24, destination 10.10.1.0 /24 would NOT be allowed)
- * Security team policy does allow corporate LAN subnets to access specific datacenter IP addresses (example: source 172.16.30.0 /24, destination 10.10.1.100 /24 would be allowed)
- * 50 of the 1,100 internal users work exclusively on tablets, some Android and some IOS devices

Which two recommendations can the architect propose? (Choose two.)

Options:

- A-** Deploy Horizon Apps and install the Windows apps on RDSH hosts. Enable Secure Gateway Mode on the connection server.
- B-** Deploy Horizon View linked-clone desktops. Enable Secure Gateway mode on the connection server.
- C-** Deploy Horizon Apps and install the Windows apps on RDSH hosts. Enable Direct Client Connection mode on the Connection Server.
- D-** Deploy Horizon View linked-clone desktops. Enable Direct Client Connection mode on the connection server.
- E-** Deploy ThinApp and package the Windows applications. Stream them to the endpoints using Secure Gateway Mode on the connection server.

Answer:

C, E

Options:

- A- 4-host cluster, FTT=2
- B- 5-host cluster, FTT=2
- C- 6-host cluster, FTT=2
- D- 3-host cluster, FTT=1
- E- 4-host cluster, FTT=1

Answer:

C, E
