Question 1

Question Type: MultipleChoice

Which is a benefit of a cloud-based SD-WAN deployment?

Options:

- A- instant scale
- B- security never a n issue
- C- agility of change dependent only on your own internal IT processes
- D- controller availability never an issue
- E- might be required for compliance with industry standards

Answer:

A

Question 2

Question Type: MultipleChoice

Which three options focus of the current digital business era? (Choose three.)

Options:

- A- IoT scale
- B- automation
- C- connectivity
- D- centralized enterprise and web applications
- E- Human scale
- F- Virtualized services

Answer:

A, B, F

Question 3

Question Type: MultipleChoice

Which feature is supported on the Cisco vEdge platform?

Options:

- A- IPv6 transport (WAN)
- B- license enforcement
- C- reporting
- D- non-Ethernet interfaces
- E- single sign-on
- F- 2-factor authentication

Answer:

A

Question 4

Question Type: MultipleChoice

Which are two Cisco recommendations that demonstrates SDA? (Choose two.)

Options:

- A-** Use the CLI to perform as much of the configuration as possible.
- B-** Keep the demo at a high level.
- C-** Focus on business benefit s.
- D-** Be sure you explain the major technologies such as VXLAN and LISP in depth.
- E-** Show the customer how to integrate ISE into DNA Center at the end of the demo.

Answer:

B, E

Question 5

Question Type: MultipleChoice

Which two statements regarding Cisco SD-WAN vEdge routers can mitigate DoS attacks against the infrastructure? (Choose two.)

Options:

- A-** The vEdge routers run on hardened Linux operating systems.
- B-** Only authorized controllers are allowed to communicate back to the vEdge router after the vEdge router establishes connection with the controllers.
- C-** In case of direct Internet access, the only traffic allowed back is the traffic matching the state table entries on the vEdge router.
- D-** Open Certificate Authority and automated enrollment feature.
- E-** By default, all incoming traffic is denied at the transport (WAN) side interfaces.

Answer:

B, C

Question 6

Question Type: MultipleChoice

What should you do if you are looking at a strategic win with a customer and the customer wants to examine Cisco ISE for longer than a few weeks?

Options:

- A-** Point them to our dCloud demo library.
- B-** Give them our ISE YouTube videos.
- C-** Set them up with a dCloud account.
- D-** Give them some of our flash files that can be played on any browser.
- E-** Provide them with a downloadable POV kit.
- F-** Set them up with an account on a Cisco UCS server that hosts ISE.

Answer:

E

Question 7

Question Type: MultipleChoice

Which three ways are SD-Access and ACI Fabric similar? (Choose three.)

Options:

A- focus on user endpoints

- B-** use of Scalable Group Tags
- C-** use of overlays
- D-** use of group policy
- E-** use of Virtual Network IDs
- F-** use of Endpoint Groups

Answer:

C, D, E

Question 8

Question Type: MultipleChoice

Which two statements are true regarding Cisco ISE? (Choose two.)

Options:

- A-** In distributed deployments, failover from primary to secondary Policy Administration Nodes happens automatically.
- B-** ISE can detected endpoints whose addresses have been translated via NAT.

- C-** In two-node standalone ISE deployments, failover must be done manually.
- D-** ISE supports IPv6 downloadable ACLs.
- E-** ISE supports up to 100 Policy Services Nodes.
- F-** The number of logs that ISE can retain is determined by your disk space.

Answer:

B, C

Question 9

Question Type: MultipleChoice

Which two statements describes Cisco SD-Access? (Choose two.)

Options:

- A-** an overlay for the wired infrastructure in which traffic is tunneled via a GRE tunnel to a mobility controller for policy and application visibility
- B-** software-defined segmentation and policy enforcement based on user identity and group membership

- C-** an automated encryption/decryption engine for highly secured transport requirements
- D-** a collection of tools and applications that are a combination of loose and tight coupling
- E-** programmable overlays enabling network virtualization across the campus

Answer:

B, E

Question 10

Question Type: MultipleChoice

Which two options are primary functions of Cisco ISE? (Choose two.)

Options:

- A-** allocating resources
- B-** enforcing endpoint compliance with network security policies
- C-** enabling WAN deployment over any type of connection
- D-** automatically enabling, disabling, or reducing allocated power to certain devices

E- providing VPN access for any type of device

F- providing information about every device that touches the network

Answer:

B, F

Question 11

Question Type: MultipleChoice

Which two activities should occur during an SE's discovery process? (Choose two.)

Options:

A- Gathering information about the current state of the customer 's network environment

B- Working with the customer to develop a reference architecture

C- Referencing the PPDIOO model to effectively facilitate the discussion

D- Establishing credibility with the customer

E- Mapping Cisco innovation to customer 's needs

Answer:

A, D

Question 12

Question Type: MultipleChoice

Which is a function of the Proactive Insights feature of Cisco DNA Center Assurance?

Options:

- A-** enabling you to quickly view all of the contextual information related to a single user
- B-** pointing out where the most serious issues are happening in the network
- C-** enabling you to see the complete path of packets from the client to the end application
- D-** generating synthetic traffic to perform tests that raise awareness of potential network issues

Answer:

D
