Your marketing group is using Jira to track media print advertisements. They would like to track TV and radio commercials as well.

The same team handles all three formats, but each format requires a unique workflow. The team would like to keep everything on the same dashboard, and they will also be using the same permissions, notifications and screens.

Without using third-party apps, how should you configure Jira to meet these requirements?

### Options:

---

- A-** Clone the existing project and key for TV and Radio.
- B-** Copy the existing permissions and notification schemes, and associate them with new projects for TV and Radio.
- C-** Create a sub-component hierarchy.
- D-** Create two new projects for TV and Radio.
- E-** Add TV and Radio into the existing project as components.
- F-** Use issue types of Print, Radio and TV in the existing project.

**Answer:**

## Question 5

---

**Question Type:** MultipleChoice

---

One of your project owners is struggling with reporting and sorting issues in her project. Currently, the classification of the issues is no more useful than a list of things that need to be done.

The project owners would like to establish the following:

- \* more classification of issues, so issues can belong to several classes
- \* the ability to edit classes
- \* a way to link a class to an owner

How would you help this project owner improve issue reporting and sorting?

**Options:**

---

- A-** Add a custom field of type Select List (multiple choices) for class, linked to a class-owner field.
- B-** Ensure the component field is available in the project and demonstrate how to use it.
- C-** Add a new labels field for the project, with labels containing the owner names.
- D-** Add a custom field of type Select List (cascading) with classes in the first tier and owners in the second tier.
- E-** Add a custom field of type Select List (multiple choices) for class, naming an owner in the options.

**Answer:**
