Question 1

Question Type: MultipleChoice

To change the occurrence of hitting others, two procedures were compared. D. differential reinforcement of incompatible behavior and time-out. The outcomes were examined within and across subjects. A withdrawal design was employed. An independent variable in this study was:

Options:

A- aggression.

B- frequency across phase changes.

C- return to baseline.

D- time-out from reinforcement.

Answer:

D

Question 2

Question Type: MultipleChoice

The systematic presentation and examination of information in an ABC format, where A represents the antecedent stimuli, B represents the behavior, and C represents the consequences following the behavior, is called D.

Options:

- A- a consequence analysis.
- B- a functional analysis.
- C- a response analysis.
- D- a descriptive assessment.

Answer:

D

Question 3

Question Type: MultipleChoice

A narrative recording is used to clearly determine all of the following EXCEPT:

Options:

A- duration of a behavior.

B- function of a behavior.

C- presence of a particular behavior.

D- topography of undesirable behavior.

Answer:

B

Question 4

Question Type: MultipleChoice

One limitation of descriptive analysis is that it:

Options:

- A- does not allow the behavior analyst the opportunity to measure, record, and interpret the data on the target behavior.
- B- does not permit the precise determination of functional relationships.
- C- provides a less than adequate description of the topography and intensity of behavior.
- D- violates the individual's right to privacy.

Answer:

B

Question 5

Question Type: MultipleChoice

Which situation is the BEST example of contingency-shaped behavior?

Options:

- A- A task analysis is used to teach Lilly how to clean her room.
- B- Dean is able to change the scale on a computerized graph after reading "how to" instructions.
- C- Billy's mother tells him not to touch the stove because he could burn himself. Billy does not touch the stove.

D- Jennifer sees a candy bar and she mands for it. Jennifer's sister gives her the candy bar and she eats it.

Answer:

D

Question 6

Question Type: MultipleChoice

Intraverbal behavior is controlled by

A.

Options:

A- verbal stimulus; the behavior does not match that stimulus; and the reinforcer is non-specific.

B- verbal stimulus; the behavior matches that stimulus; and the reinforcer is specific.

C- verbal stimulus; the behavior matches that stimulus; and the reinforcer is non-specific.

D- verbal stimulus; the behavior does not match that stimulus; and the reinforcer is specific.

Answer:

A

Question 7

Question Type: MultipleChoice

A functional relationship exists only iF.

Options:

- A-** changes in a response class produce a functional consequence.
- B-** changes in a stimulus class consistently alter a property of a response class.
- C-** reinforcement is contingent upon responding.
- D-** a stimulus elicits a response without previous conditioning.

Answer:

B

Question 8

Question Type: MultipleChoice

Which of the following scenarios involves a behavioral contingency?

Options:

- A- James ate dinner tonight and came down with indigestion.
- B- While throwing a chair, Linda bit her tongue.
- C- Susan hit her head on the wall, and a staff person asked her to stop.
- D- When asked to do her tasks, Doris said, 'I will not do that!'

Answer:

C

Question 9

Question Type: MultipleChoice

An establishing operation is any change in the environment which.

Options:

- A-** momentarily alters the effectiveness of the consequence for a behavior that was previously followed by reinforcement.
- B-** alters the timing of a behavior and momentarily alters the frequency of the behavior that was previously followed by reinforcement.
- C-** alters the effectiveness of some object or event as reinforcement thus momentarily changing the likelihood of behavior that was previously followed by that reinforcer.
- D-** alters the effectiveness of some object or event as a contingency-shaped rule and at the same time changes the momentary frequency of the behavior that was previously followed by reinforcement.

Answer:

C

Question 10

Question Type: MultipleChoice

What best defines a discriminative stimulus?

Options:

A- It always elicits a response.

B- It is defined by its effect on behavior.

C- It is established using either operant or respondent procedures.

D- It is any change in the environment.

Answer:

B
