## Question 1

---

**Question Type:** MultipleChoice

---

Which of the following statements are applicable to the technology of massive MIMO?

(Select 3)

**Options:**

---

- A-** Several data flows are sent at the same time on the same frequency.
- B-** The signals on each antenna are made orthogonal.
- C-** The data flows are sent at the same time on different frequencies.
- D-** Transmit diversity is used in case of poor radio conditions.

**Answer:**

---

A, B, D

## Question 2

---

**Question Type:** MultipleChoice

---

You are working in a logistics company. Your manager is telling you that automation is very important to create more opportunities for the company. His idea is to deliver parcels using drones. With this in mind, he asks you if a 4G network provides good connectivity for controlling the delivery drones. How would you answer him and why?

**Options:**

---

- A-** Yes, 4G provides a connectivity network but, it is quite expensive. WIFI may be a preferable option.
- B-** No, a 4G network is not a good choice for drone control because big operators (with whom we cannot deal) mainly deliver it.
- C-** No, a 4G network cannot deliver the required connectivity. It is not able to guarantee the latency and reliability required for drone control.
- D-** Yes, the drone control application can be hosted in the cloud and the 4G network can provide the speed needed to reach the application and control the drones.

**Answer:**

---

D

## Question 3

---

**Question Type:** MultipleChoice

---

What functionality is applied by SDN to find an alternative path in case of failure in the Transport Network?

**Options:**

---

- A- Path Correlation Engine
- B- Alternative Route Finding
- C- Alternative Path Computing
- D- Path Computation Engine

**Answer:**

---

C

## Question 4

---

**Question Type: MultipleChoice**

---

What does 5G bring to Industry 4.0? (Choose two.)

**Options:**

---

- A-** 5G will generate a huge amount of data and Information Technology will provide the computing platform with analytics and AI.
- B-** 5G provides the connectivity (bandwidth, latency and reliability) needed to exchange data for OT and IT functionality.
- C-** 5G brings nothing to Industry 4.0.
- D-** 5G will generate a huge amount of data with mMTC and IT platforms are expected to suffer from this.

**Answer:**

---

A, B

## Question 5

---

**Question Type:** MultipleChoice

---

Is it possible for a User Equipment to connect simultaneously to multiple slices in 5G?

**Options:**

---

**A-** No

**B-** Yes

**Answer:**

---

B

**Explanation:**

---

imultaneously

## Question 6

---

**Question Type:** MultipleChoice

---

Which of the following are 4G limitations that justify a roll-out to 5G? (Choose three.)

**Options:**

---

**A-** Low peak and end-user-experience throughput

- B-** Low reliability
- C-** High latency
- D-** Beamforming is not supported

**Answer:**

---

A, B, C

## Question 7

---

**Question Type:** MultipleChoice

---

Which of the following statements about Network Slicing are correct? (Choose three.)

**Options:**

---

- A-** Multiple slices create multiple virtual network instances.
- B-** Unique Quality of Service can be allocated to a given slice.
- C-** Specific resources can be allocated to a given slice.
- D-** Network Slicing is a way to physically partition the common network infrastructure.

**Answer:**

---

A, B, C

## Question 8

---

**Question Type: MultipleChoice**

---

What is the best solution for deploying an optimal network function distribution?

**Options:**

---

**A-** Using duplicated Virtual Network Functions

**B-** Using Virtual Network Functions to control the routing

**C-** Using Virtual Network Functions orchestrated across various Cloud Data Centers

**D-** Using Virtual Network Functions in Access

**Answer:**

---

C
