# Question 1

---

**Question Type:** MultipleChoice

---

The following table reports are for five hotels belonging to the same hotel chain, the rank in terms of sales performance (with 1 - best average score obtained in customer reviews, and the rank in terms of average score from customer reviews (with 1 = best average ..

Calculate the Spearman's rank correlation coefficient to one decimal place:

Hotel	Sales performance rank	Average review score	Average review score rank
A	4	3	5
B	3	3.8	3
C	5	3.6	4
D	1	4	2
E	2	4.5	1

**Options:**

---

**A-** 1.8

**B-** 2.8

**C-** 3.8

**D-** 4.8

**Answer:**

---

A

## Question 2

---

**Question Type:** MultipleChoice

---

If country A imposes a quota on imports from country B, what is the direct effect of the quota?

**Options:**

---

- A- The price of imports into country A will rise
- B- The price of imports into country A will fall
- C- The quantity of imports into country A will fall
- D- The quantity of imports into country A will rise

**Answer:**

---

C

## Question 3

---

**Question Type:** MultipleChoice

---

Which TWO reasons support the argument that global firms may facilitate globalisation?

### Options:

---

- A- Global firms can lobby governments to open up markets for free trade
- B- Global firms can bring stability to international stock markets
- C- Global firms can be immune from national concerns
- D- Global firms can forfeit national laws under certain conditions
- E- Global firms can lead to greater homogenisation of tastes and values across different countries.

### Answer:

---

B, E

## Question 4

---

**Question Type:** MultipleChoice

---

If the production of a good involves an external social cost, resource allocation could be improved by:

**Options:**

---

- A- providing a subsidy for the consumers of the good
- B- imposing an indirect tax on the good
- C- providing a subsidy for the producers of the good
- D- the government imposing price controls to reduce the price of the good.

**Answer:**

---

B

## Question 5

---

**Question Type: MultipleChoice**

---

Based on a trade balance between Country A and Country B over a ten year period, the underlying trend of the trade balance is represent equation

-114.027 -1.47x

where  $x$  is the time period expressed in years.

Assuming an additive forecasting model, with a seasonal factor of 82.6, then the forecast for year 2016, in whole units is:

**Options:**

---

A- -113968

B- -113868

C- -113768

D- -113668

**Answer:**

---

A

## Question 6

---

**Question Type:** MultipleChoice

---

Which TWO of the following would be objectives for internal stakeholders in a profit-seeking organisation?

**Options:**

---

- A- improving the working condition and pay levels for the employees
- B- Maximising shareholder wealth
- C- Meeting the legally required environmental standards in the industry
- D- Raising the level of dividends paid out
- E- Increasing the remuneration packages of the company directors

**Answer:**

---

A, E

## Question 7

---

**Question Type: MultipleChoice**

---

A hairdressing salon can either invest in

1. New. more comfortable chairs at a cost of \$5,000

2. New shop windows at a cost of \$4,000

Over the next five years. Investment 1 will generate an additional amount of profit whose present value is \$6,000. while Investment 2 additional amount of profit whose present value is \$5,500

What is the net present value of the best project? Give your answer to the nearest whole dollar.

**Options:**

---

A- \$1500

B- \$1400

C- \$1300

D- \$1200

**Answer:**

---

A

## Question 8

---

Question Type: MultipleChoice

---

A study on a sample of 100 university students reports that the correlation coefficient between the students' attendance at accounting final accounting exam grade is 0.7.

Which of the following statements is true?

**Options:**

---

**A-** 7% of an increase in grade can be explained by an increase in attendance.

**B-** Low attendance at lectures caused students to achieve lower grades

**C-** Students who attended more lectures tended to achieve higher grades

**D-** If we considered the same sample of 100 students, the correlation between attendance at economics lectures and their final econ would also be positive

**Answer:**

---

D

## Question 9

---

**Question Type:** MultipleChoice

---

Which of the following describes the effect an interest rate rise may have on a company?

**Options:**

---

- A- Prices will have to increase due to increased inflationary pressures
- B- Sales will increase as consumers have stable incomes in the short term.
- C- The cost of financing projects through loans will increase
- D- The cost of holding stock will reduce

**Answer:**

---

C

## Question 10

---

**Question Type: MultipleChoice**

---

A car dealer uses the following trend equation to estimate the number of cars sold each quarter

$$Y = 120 + 3t$$

Where  $y$  = number of cars sold each quarter and  $t$  = time period expressed in units

What is the forecasted number of cars sold in period 12. if there is an additive seasonal factor of 55?

**Options:**

---

**A-** 156

**B-** 101

**C-** 211

**D-** 139

**Answer:**

---

C

## Question 11

---

**Question Type:** MultipleChoice

---

Larger companies may benefit from economies of scale due to which THREE of the following?

**Options:**

---

- A- Larger companies may gain greater market share through advertising
- B- Larger companies may spread their fixed research and development costs over a larger amount of output
- C- Larger companies may more easily access public subsidies
