Options:

A- is understood independently of other requirements or designs.

B- contains no extraneous or unnecessary content.

C- uses common terminology understood by the audience.

D- aligns with the identified needs of the stakeholders.

Answer:

A

Question 5

Question Type: MultipleChoice

When planning business analysis information management, what are the factors that influence storage and access decisions?

Options:

A- Organizational values and procurement strategy

B- Business rules and change strategy

C- Business policies and methodology adopted

D- Organizational standards and tool availability

Answer:

D

Explanation:

Business analysis information can be stored in many ways. Storage decisions depend on many factors such as who must access the information, how often they need to access it, and what conditions must be present for access. Organizational standards and tool availability also influence storage and access decisions. The business analysis approach defines how various tools will be used on the initiative and how the information will be captured and stored within those tools. Tools may shape the selection of business analysis techniques, notations to be used, and the way that information is organized.

Question 6

Question Type: MultipleChoice

The task that uses the elicitation activity plan to draw out, explore and identify information relevant to the change is:

Options:

A- conduct elicitation.

B- prepare for elicitation.

C- plan business analysis information.

D- confirm elicitation results.

Answer:

A

Explanation:

The purpose of Conduct Elicitation is to draw out, explore, and identify information relevant to the change.

Question 7

Question Type: MultipleChoice

Which business analysis activity ensures that a set of requirements or designs delivers business value and supports the organization's goal and objectives?

Options:

A- Define solution options

B- Verify requirements

C- Validate requirements

D- Define requirements architecture

Answer:

C

Explanation:

Validate requirements ensures that a set of requirements or designs delivers business value and supports the organization's goals and objectives.

Question 8

Question Type: MultipleChoice

One element of the task plan business analysis information management is:

Question 9

Question Type: MultipleChoice

What is the relationship between two requirements called when one requirement can be deduced from another at a higher level?

Options:

A- Satisfy

B- Necessity

C- Effort

D- Derive

Answer:

D

Explanation:

Derive: relationship between two requirements, used when a requirement is derived from another requirement. This type of relationship is appropriate to link the requirements on different levels of abstraction. For example, a solution requirement derived from a business or a stakeholder requirement.

Question 10

Question Type: MultipleChoice

Which type of requirements are temporary in nature?

Options:

A- Business requirements

B- Solution requirements

C- Stakeholder requirements

D- Transition requirements

Answer:

D

Explanation:

A requirement that describes the capabilities the solution must have and the conditions the solution must meet to facilitate transition from the current state to the future state, but which are not needed once the change is complete. They are differentiated from other requirements types because they are of a temporary nature.
