Question 1

Question Type: MultipleChoice

Parameter representation upsPollution to the power grid.

Options:

- A- Output power factor
- B- Input current harmonics
- C- Overload capacity
- D- efficient

Answer:

B

Question 2

Question Type: MultipleChoice

In the main road mode, when ups The front-end voltage is at 220V10%When fluctuating,ups The output voltage will also have Larger fluctuations.

Options:

A- True

B- False

Answer:

B

Question 3

Question Type: MultipleChoice

UPS systematic N+X System ratio 2N The power supply guarantee level of the system is higher.

Options:

A- True

B- False

Answer:

B

Question 4

Question Type: MultipleChoice

The following is for high frequency ups The correct description of the rectifier components is.

Options:

A- Complete AC to DC conversion

B- Complete DC to AC conversion

C- Realize power factor correction and pressure reduction function

D- Realize power factor correction and boost function

Answer:

A, D

Question 5

Question Type: MultipleChoice

The dynamic environment monitoring system supports the alarm management function.

Options:

A- True

B- False

Answer:

A

Question 6

Question Type: MultipleChoice

The device cannot be connected to the southbound interface of the dynamic environment monitoring system.

Options:

- A- Precision air conditioner
- B- UPS
- C- Access control equipment
- D- Upper-level network management

Answer:

D
