## Question 1

---

Question Type: MultipleChoice

---

IO request FC-SAN, the server -side components which need to go through in order to reach the ultimate storage medium: (Choose three)

Options:

- A- Server operating system
- B- Fabric Switches
- C- Front-end interface card storage devices
- D- Storage device management network port

Answer:

A, B, C

## Question 2

---

Question Type: MultipleChoice

---

OceanStor series storage systems in two ways by which to detect hard disk damage? (Choose two)

Options:

- A- Failure to read and write automated analysis
- B- Active scanning hard disk media
- C- Power Detection
- D- Service data flow anomaly detection

Answer:

A, B

## Question 3

---

Question Type: MultipleChoice

---

Add under Solaris system target IP address of the command iscsiadm add discovery-address

Options:

A- True

B- False

Answer:

A

## Question 4

Question Type: MultipleChoice

In the case of Web services applications, Email, database applications, such as reading and writing small files frequently, SAN performance is mainly determined by the bandwidth; video, mapping and other large files under sustained read and write operations, SAN performance is mainly determined by the IOPS.

Options:

A- True

B- False

Answer:

B

## Question 5

Question Type: MultipleChoice

Which of the following does not belong to improve the reliability of data storage methods?

Options:

A- Component redundancy

- B- Hot-spare technology
- C- Cache mirroring
- D- Intelligent prefetching

Answer:

D

## Question 6

Question Type: MultipleChoice

MSCS clustering software which can be attributed to the level of reliability guarantee?

Options:

- A- Network layer
- B- Operating system layer
- C- Hardware driver layer
- D- File system layer

Answer:

B

## Question 7

Question Type: MultipleChoice

SAS wide port defined on the transmission medium, which of the following is wrong?

Options:

- A- Wide port is composed of a plurality of phy
- B- Each consisting of wide port SAS phy whose address is the same
- C- Port connected to the port width is not necessarily wide port
- D- Wide bandwidth for each port is the sum of the bandwidth phy

Answer:

---

C

## Question 8

---

Question Type: MultipleChoice

---

In the IP SAN network storage excluded iSCSI iSCSI host connectivity service port IP network cannot fault, where the main aspects of the investigation? (Choose two)

Options:

- A- Host iSCSI initiator file configuration errors
- B- iSCSI initiator service does not start
- C- VLAN configuration is reasonable
- D- IP, gateway, mask configuration is reasonable

Answer:

---

C, D

## Question 9

---

Question Type: MultipleChoice

---

Snapshot of the storage array, LUN copy and remote replication, the following statement is correct. (Choose two)

Options:

- A- You can do both on a LUN snapshot and replication do
- B- A remote copy of the source LUN can be used as another remote replication target LUN
- C- A remote copy can be used as another source LUN LUN LUN copy source
- D- Cannot do both on a LUN snapshot and do remote replication

Answer:

---

A, C
