Question 1

Question Type: Hotspot

You have a Microsoft 365 subscription That contains two administrative units named AU1 and AU2.

The subscription contains the users shown in the following table.

Name	Administrative unit	Role	Scope
User1	None	User Administrator	AU1
			None
			Organization

Name	Members	Administrative unit
Group1	User3	AU2
Group2	User2 User3	AU1

Answer Area

True. Otherwise, select No.

Statements	Yes	No
User1 can reset the password of User2.	<input type="radio"/>	<input type="radio"/>
User2 can modify the membership of Group1.	<input type="radio"/>	<input type="radio"/>
User1 can reset the password of User3.	<input type="radio"/>	<input type="radio"/>

Answer:

Question 2

Question Type: Hotspot

You have a Microsoft 365 subscription.

You need to identify all users that have an Enterprise Mobility + Security plan, and then provide a list of the users in the CSV format.

Which settings should you use in the Microsoft 365 admin center, and which option should you select? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Answer:

Question 3

Question Type: Hotspot

You have a Microsoft 365 E5 subscription.

You plan to implement identity protection by configuring a sign-in risk policy and a user risk policy. Which type of risk is detected by each policy? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Answer:

Sign-in risk policy:

Leaked credentials

Atypical travel

Leaked credentials

Possible attempt to access Primary Refresh Token (PRT)

User risk policy:

Malicious IP address

Leaked credentials

Malicious IP address

Suspicious browser

Question 4

Question Type: MultipleChoice

Your company has three main offices and one branch office. The branch office is used for research.

The company plans to implement a Microsoft 365 tenant and to deploy multi-factor authentication.

You need to recommend a Microsoft 365 solution to ensure that multi-factor authentication is enforced only for users in the branch office.

What should you include in the recommendation?

Options:

A- Azure AD password protection

B- a Microsoft Intune device configuration profile

C- a Microsoft Intune device compliance policy

D- Azure AD conditional access

Answer:

D

Question 5

Question Type: MultipleChoice

Your on-premises network contains an Active Directory domain.

You have a Microsoft 365 E5 subscription.

You plan to implement a hybrid configuration that has the following requirements:

- * Minimizes the number of times users are prompted for credentials when they access Microsoft 365 resources
- * Supports the use of Azure AD Identity Protection

You need to configure Azure AD Connect to support the planned implementation. Which two options should you select? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

Options:

- A- Password Hash Synchronization
- B- Password writeback
- C- Directory extension attribute sync
- D- Enable single sign-on
- E- Pass-through authentication

Answer:

A, B

Question 6

Question Type: Hotspot

You have a Microsoft 365 E5 subscription that contains the users shown in the following table.

Name	Member of	Passwordless capable	Multi-factor authentication (MFA) method registered
User1	Group1	Capable	Microsoft Authenticator app (push notification)
User2	Group2	Capable	Microsoft Authenticator app (push notification)
User3	Group1, Group2	Capable	Mobile phone, Windows Hello for Business

Each user has a device with the Microsoft Authenticator app installed.

From Microsoft Authenticator settings for the subscription, the Enable and Target settings are configured as shown in the exhibit. (Click the Exhibit tab.)

Microsoft Authenticator settings ...

i Number Matching will begin to be enabled for all users of the Microsoft Authenticator app starting 27th of February 2023. [Learn more](#)

The Microsoft Authenticator app is a flagship authentication method, usable in passwordless or simple push notification approval mode. The app is free to download and use on Android/iOS mobile devices. [Learn more](#).

Target All users Select groups

[Add groups](#)

Name	Type	Registration	Authentication mode
Group1	Group	Optional <input type="text"/>	Passwordless <input type="text"/>

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer Area

Answer:

Statements

Yes

No

User1 can use number matching during sign-in.

User2 can use number matching during sign-in.

Question 7

Question Type: Hotspot

User3 can use number matching during sign-in.

You have a Microsoft 365 Enterprise E5 subscription.

You add a cloud-based app named App1 to the Azure AD enterprise applications list.

You need to ensure that two-step verification is enforced for all user accounts the next time they connect to App1.

Which three settings should you configure from the policy? To answer, select the appropriate settings in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

New ...

Conditional Access policy

Control access based on Conditional Access policy to bring signals together, to make decisions, and enforce organizational policies. [Learn more](#)

Name *

App1 policy ✓

Assignments

Users or workload identities ⓘ

All users

Cloud apps or actions ⓘ ✓

No cloud apps, actions, or authentication contexts selected

Conditions ⓘ

0 conditions selected

Access controls

Grant ⓘ ✓

0 controls selected

Control access based on who the policy will apply to, such as users and groups, workload identities, directory roles, or external guests. [Learn more](#)

What does this policy apply to?

Users and groups ▼

Include Exclude

- None
- All users
- Select users and groups

⚠ Don't lock yourself out! This policy will affect all of your users. We recommend applying a policy to a small set of users first to verify it behaves as expected.

Answer:

Question 8

Question Type: Hotspot

Your network contains an Active Directory domain and an Azure AD tenant.

You implement directory synchronization for all 10,000 users in the organization.

You automate the creation of 100 new user accounts.

You need to ensure that the new user accounts synchronize to Azure AD as quickly as possible.

Which command should you run? To answer, select the appropriate options in the answer area.

Answer Area

Start-ADSyncSyncCycle	▼
Start-ADSyncSyncCycle	
Set-ADSyncScheduler	
Invoke-ADSyncRunProfile

Answer:

Question 9

Question Type: Hotspot

You have a hybrid deployment of Azure AD that contains the users shown in the following table.

Name	Description
User1	Azure AD Connect sync account
User2	Contributor for Azure AD Connect Health
User3	Application administrator in Azure AD

:

the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Answer:

View sync errors in Azure AD Connect Health:

- User2
- User1
- User2
- User3

Configure Azure AD Connect Health settings:

- User1
- User1
- User2
- User3
