Question 1

Question Type: MultipleChoice

The HTTP protocol can be used together with SOAP-based Web services and REST services. Select the correct answer.

Options:

A- True

B- False

Answer:

A

Question 2

Question Type: MultipleChoice

The amount of services participating in a service activity, the duration of the service activity, the amount of service activity instances that concurrently exist, and rules associated with the service activity are all examples of: Select the correct answer.

Options:

A- design-time data that is defined via the WSDL data definition language

B- runtime data that is expressed as part of a WSDL service operation definition

C- state or context data that can be managed using WS-Coordination

D- repository resource data that can be managed using WS-Policy via persistence in a database for long-term storage

Answer:

C

Question 3

Question Type: MultipleChoice

Which of the following statements is true? Select the correct answer.

Options:

A- WSDL definitions can use XML schemas to define the types used by WSDL input and output messages.

B- WSDL definitions can use XML schemas to define the types used by WSDL input and output operations.

C- WSDL definitions can use XML schemas to define the types used to establish the location used by service consumers to access the WSDL definitions.

D- WSDL definitions cannot be used in conjunction with XML schemas.

Answer:

A

Question 4

Question Type: MultipleChoice

XML is a form of: Select the correct answer.

Options:

A- microdata

B- metadata

C- valid data

D- relational data

Answer:

B

Question 5

Question Type: MultipleChoice
