Question 1

Question Type: MultipleChoice

There are two parties in the V model:

the supplying party

the accepting party

Which system development phase or test phase is not performed by the supplying party?

Options:

A- Functional design

B- Realization

C- System test

D- Technical design

Answer:

D

Question 2

Question Type: MultipleChoice

When customer data is entered, it is mandatory to specify an e-mail address. Which test design technique can be used to test the above?

Options:

A- Data Cycle Test

B- Process Cycle Test

C- Syntactic Test

Answer:

C

Question 3

Question Type: MultipleChoice

See the illustration below:

In order to test a registration application for a weekend trip, logical test cases must be created according to the Data Combination Test. It is agreed to conduct light testing. One data pair is defined that must be fully tested in combination:

day ?attraction

Using a classification tree, six test cases are designed.

Where should the 'bullets' for test case 4 be placed?

Options:

A- Saturday, zoo, 2nd

B- Sunday, zoo, family car

C- Sunday, zoo, 2nd

Answer:

C

Question 4

Question Type: MultipleChoice

During which TMap phase is testing 'dynamic implicit'?

Options:

A- Specification

B- Execution

C- Preparation

Answer:

B

Question 5

Question Type: MultipleChoice

What is the correct description of the term est level?

Options:

A- the information that defines the required system behavior

B- a group of test activities with the attention of checking the information system in respect of a number of correlated (part aspects of) quality characteristics

C- a group of test activities that are managed and executed collectively

Answer:

C

Question 6

Question Type: MultipleChoice

Which TMap phase may be located on the critical path?

Options:

A- Planning and Control

B- Specification

C- Execution

D- Preparation

Answer:

C

Question 7

Question Type: MultipleChoice

See the procedure flow below:

How many test situations are produced when the coverage type paths with test depth level 2 is used?

Options:

A- 3

B- 8

C- 12

D- 13

Answer:

D

Question 8

Question Type: MultipleChoice

Is the checklist created to determine the test basis dependent on the selected test design technique?

Options:

A- yes

B- no

Answer:

A

Question 9

Question Type: MultipleChoice

What is the aim of a unit test?

Options:

- A-** to demonstrate that a unit meets the functional specifications
- B-** to demonstrate that a unit meets the technical specifications
- C-** to demonstrate that a unit integrates properly with other units

Answer:

B

Question 10

Question Type: MultipleChoice

Which defects can be detected more effectively with development tests than with system and/or acceptance tests?

Options:

- A- defects related to effectivity
- B- defects related to the database and/or the operating system
- C- defects related to the functional specifications
- D- defects related to performance

Answer:

B

Question 11

Question Type: MultipleChoice

What is the definition of valuation?What is the definition of ?valuation?

Options:

- A- Evaluation gives insight in the actual and future status of the end product.

B- Evaluation is a process that gives insight into and advice on quality and related risks.

C- Evaluation is assessing the interim products in the system development process.

Answer:

C

Question 12

Question Type: MultipleChoice

See the specification below:

Apply the Decision Table Test to the above specification. When doing this, use the coverage type multiple condition coverage. How many logical test cases result in an error message?

Options:

A- 1

B- 2

C- 3

D- 4

Answer:

B
