Question 1

Question Type: MultipleChoice

Three parameters play a role for a printing function and for every parameter there are two equivalence classes to be tested:

Which combination is missing in the table if the coverage type pairwise testing is applied?

Options:

- A- arial color 10
- B- arial black 12
- C- verdana color 10
- D- verdana black 10

Answer:

C

Question 2

Question Type: MultipleChoice

What is not one of the aims of the 'testability review test basis' report?

Options:

- A- providing feedback on the quality of the test basis and its impact on the planned test procedure
- B- gaining an insight into the estimation for the test procedure
- C- obtaining information on project risks
- D- discussing the weak spots in the system design on time

Answer:

B

Question 3

Question Type: MultipleChoice

What is the aim of the activity 'assessing the test basis'?

Options:

- A- to determine the risk of the various system components
- B- to select the most suitable test design techniques
- C- to determine whether the delivered system components can be tested in a useful manner
- D- to establish the testability of the test basis

Answer:

D

Question 4

Question Type: MultipleChoice

Which test design technique uses operational profiles and load profiles?

Options:

- A- Data Cycle Test

- B- Process Cycle Test
- C- Real-Life Test
- D- Use Case Test

Answer:

C

Question 5

Question Type: MultipleChoice

What can be avoided by consolidating separate checklists into one checklist for assessing a test basis?

Options:

- A- finding the same test basis defect more often
- B- using a particular checklist in both the acceptance and system tests
- C- that every project compiles its own checklist
- D- duplicating work on identical parts of the test basis during the evaluation

Answer:

D

Question 6

Question Type: MultipleChoice

See the specification below:

IF A AND (B OR C)

THEN error message

ENDIF

How many logical test cases are distinguished if Semantic Testing with coverage type decision points condition/decision coverage is used?

Options:

A- 2

B- 3

C- 4

D- 8

Answer:

A

Question 7

Question Type: MultipleChoice

The test infrastructure consists of facilities and resources required to conduct testing effectively. Which facility does not belong to the testing infrastructure?

Options:

A- test environments

B- test design techniques

C- test tools

D- workplaces

Answer:

B

Question 8

Question Type: MultipleChoice

See the illustration below:

What is the minimum number of logical test cases generated by the use of the Process Cycle Test if the coverage type paths test depth level 2 is used?

Options:

A- 3

B- 5

C- 6

D- 9

Answer:

C

Question 9

Question Type: MultipleChoice

Which system development method is agile and contains structured guidelines for development testing?

Options:

A- DSDM

B- SDM

C- XP

Answer:

C

Question 10

Question Type: MultipleChoice

See the illustration below:

Which test situations can be differentiated when the coverage type paths test depth level 2 is used?

Options:

A- 1-2; 2-3; 3-4; 2-4; 2-5; 2-6; 3-5; 3-6; 4-5; 4-6; 5-6

B- 1-2; 1-3; 1-4; 2-5; 3-5; 4-5; 2-6; 3-6; 4-6

C- 1-2-5; 1-2-6; 1-3-6; 1-3-5; 1-4-6; 1-4-5

Answer:

B

Question 11

Question Type: MultipleChoice

The specification of test cases according to a test design technique follows five general steps. Which step is establishing the starting point? Which step is establishing the starting point?

Options:

A- step 2

B- step 3

C- step 4

D- step 5

Answer:

C
