Question 1

Question Type: MultipleChoice

Which F5 virtualization technologies are available for optimizing application delivery?

(Select all that apply)

Select:

Options:

- A- Virtual Servers
- B- Virtual IPs
- C- Virtual Machines
- D- Virtual Reality

Answer:

A, B

Question 2

Question Type: MultipleChoice

In the context of dynamic provisioning of an F5 instance, what is a workflow?

Select one:

Options:

- A- A list of preferred employee hairstyles
- B- A step-by-step guide to making the best office coffee
- C- A document outlining company vacation policies
- D- A series of automated tasks and processes for provisioning and configuring an F5 instance

Answer:

D

Question 3

Question Type: MultipleChoice

Which constraints can SDN technologies impose on F5 components in a cloud environment?

(Select TWO)

Choose:

Options:

- A- Enhanced automation capabilities
- B- Incompatibility with F5 hardware
- C- Limited scalability
- D- Reduced network programmability

Answer:

C, D

Question 4

Question Type: MultipleChoice

Which factors are crucial when evaluating a cloud migration plan for applications?

(Select TWO)

Choose:

Options:

- A- Employee preference for cloud services
- B- Cloud provider marketing campaigns
- C- Network latency and bandwidth requirements
- D- Application dependencies and integrations

Answer:

A, C

Question 5

Question Type: MultipleChoice

What is a key benefit of deploying F5 instances on a cloud infrastructure?

Select one:

Options:

- A- Increased physical server maintenance
- B- Improved application performance and scalability
- C- Reduced access to cloud resources
- D- Decreased network bandwidth

Answer:

B

Question 6

Question Type: MultipleChoice

What is the main advantage of using containers, such as Docker, in cloud deployments?

Choose one:

Options:

- A- Containers can only run on a single server.
- B- Containers are designed for monolithic applications.
- C- Containers require minimal system resources.
- D- Containers cannot be easily moved between environments.

Answer:

C

Question 7

Question Type: MultipleChoice

When implementing a Cloud migration plan for applications, what variables should be evaluated?

(Select all that apply)

Choose:

Options:

- A- Employee lunch preferences
- B- Network latency and bandwidth
- C- Security and compliance requirements
- D- The IT team's favorite music playlist

Answer:

B, C
