# Question 1

Question Type: MultipleChoice

Refer to the exhibit.

FortiADC is applying SNAT to all inbound traffic going to the servers. When an attack occurs, FortiWeb blocks traffic based on the 192.0.2.1 source IP address, which belongs to FortiADC. The setup is breaking all connectivity and genuine clients are not able to access the servers.

What must the administrator do to avoid this problem? (Choose two.)

**Options:**

---

- A-** Enable the Use X-Forwarded-For setting on FortiWeb.
- B-** No Special configuration is required; connectivity will be re-established after the set timeout.
- C-** Place FortiWeb in front of FortiADC.
- D-** Enable the Add X-Forwarded-For setting on FortiWeb.

**Answer:**

---

A, C

## Question 2

---

**Question Type:** MultipleChoice

---

Which two configuration actions are possible when protecting application delivery servers from clients with IP addresses in the IP reputation database? (Choose two.)

**Options:**

---

- A-** Automatically create a WAF profile based on the traffic
- B-** Redirect the traffic to a different URL
- C-** Block the traffic.
- D-** Analyze the traffic using WVS rules

**Answer:**

---

B, C

## Question 3

---

**Question Type:** MultipleChoice

---

What is the primary function of a virtual server?

**Options:**

---

- A-** It balances traffic between real server pools

- B-** It manages real server resources
- C-** It processes client connections for application delivery
- D-** It detects real server vulnerabilities using VWS

**Answer:**

---

A, C

## Question 4

---

**Question Type:** MultipleChoice

---

An administrator is managing a web site that uses specialized servers for streaming, in addition to servers that handle HTTP traffic.

To make sure that specialized servers handle the streaming traffic, what FortiADC capacity should they use?

**Options:**

---

- A-** Persistence rules
- B-** Content routing

**C-** Dynamic load balancing

**D-** HTTP compression

**Answer:**

---

B

## Question 5

---

**Question Type:** MultipleChoice

---

To which two objects can link policies apply in FortiADC? (Choose two.)

**Options:**

---

**A-** Virtual tunnel

**B-** Virtual server

**C-** Gateway

**D-** Link group

**Answer:**

---

A, D

## Question 6

---

**Question Type:** MultipleChoice

---

To which two objects can link policies apply in FortiADC? (Choose two.)

**Options:**

---

**A-** Virtual tunnel

**B-** Virtual server

**C-** Gateway

**D-** Link group

**Answer:**

---

A, D

## Question 7

---

**Question Type:** MultipleChoice

---

What is the primary function of a virtual server?

### Options:

---

- A-** It balances traffic between real server pools
- B-** It manages real server resources
- C-** It processes client connections for application delivery
- D-** It detects real server vulnerabilities using VWS

### Answer:

---

A, C
