Question 1

Question Type: MultipleChoice

An engineer wants to manually deploy a CISCO Webex DX80 Video endpoint to a remote user. Which type of provisioning is configured on the endpoint?

Options:

- A- Cisco Unified Border Element
- B- Cisco Unity Connection
- C- Cisco Meeting Server
- D- Edge

Answer:

D

Explanation:

The Cisco Webex DX80 Video endpoint can be provisioned in two ways:

Automatically, using the Cisco Unified Communications Manager (CUCM) or Cisco Video Communication Server (VCS)

Manually, using the Edge provisioning mode

The Edge provisioning mode is used when the endpoint is not connected to the CUCM or VCS. In this mode, the endpoint is configured with the necessary settings, such as the IP address, SIP/H.323 parameters, and time and date.

The Cisco Unified Border Element (Cisco UBE) is a network element that provides security and call control for IP telephony networks. The Cisco Unity Connection is a unified messaging system that provides voicemail, email, and fax services. The Cisco Meeting Server is a video conferencing system that provides high-quality video and audio conferencing.
