## Question 1

---

Question Type: MultipleChoice

---

In an HW MPLS network, what parameters are used to define a forwarding equivalent class??

Options:

- A- BGP MED ?
- B- IP prefix
- C- RSVP requests resource reservation
- D- from CE Layer 2 links

Answer:

B, D

---

## Question 2

---

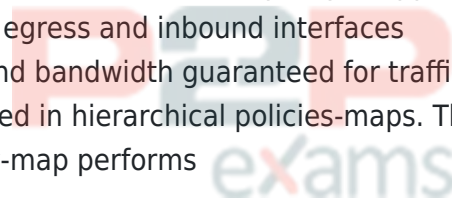

Question Type: MultipleChoice

---

The following description of CBWFQ is correct?

Options:

- A- CBWFQ can be configured with MQC and service-policy is applied to the exit direction
- B- CBWFQ can be used for both egress and inbound interfaces
- C- CBWFQ is delayed, jittered and bandwidth guaranteed for traffic catch
- D- CBWFQ can only be configured in hierarchical policies-maps. The parent policy-map performs supervision and the child policy-map performs

Answer:

A

---

## Question 3

---

Question Type: MultipleChoice

---

There is an existing router running OSPF HWL, HW1 interface serial0 is published in zone 1,

configure commands under the OSPF process nssa default-route-advertise, based on the previous description, infers which of the following options are correct?

#### Options:

- A- When HW1 injects a default route into Zone 1, HW1's local route table can not contain a single default route
- B- HW1 injects a Type 7 default route into Zone 0
- C- HW1 injects a type 7 default route into zone 1
- D- HW1 injects a Type 3 default route into Zone 1
- E- When HW1 injects a default route into zone 1, HW1's local route table needs to answer the default route

#### Answer:

C, E

## Question 4

Question Type: MultipleChoice

If the receive cache of a switch's gigabit Ethernet interface is full, what protocol does the switch use to know that the remote interface delays sending data frames for a period of time?

#### Options:

- A- 8023af
- B- 8021U
- C- 8021D
- D- 8023
- E- 8023Z

#### Answer:

E

## Question 5

Question Type: MultipleChoice

In an Hw IP multicast network---which of the following multicast features are associated with (\*, G) table entries? ( Multiple select)

Options:

- A- Dense mode
- B- Source tree
- C- Sparse mode
- D- PIM bidirectional E. Share the tree
- E- Dense Tree

Answer:

C, D, E

## Question 6

Question Type: MultipleChoice

What are the benefits of using WRED?( Multi-select)

Options:

- A- Provides some low latency
- B- Avoid TCP global synchronization
- C- Avoid congestion completely
- D- Provides a small bandwidth guarantee
- E- Can avoid UDP occupying most of the bandwidth when congested

Answer:

C

## Question 7

Question Type: MultipleChoice

D Class IP address range 239000-239255255,What does 255 do? Radio

Options:

---

- A- SSM multicast address, the multicast address segment is valid for the whole network
- B- Any legitimate multicast traffic and multicast application can adopt this address
- C- Locally managed multicast address, which is valid only locally
- D- Link-local multicast address, where traffic that uses that address includes network control messages and that address range is only the multicast address segment used by the E. routing protocol

Answer:

---

C

## Question 8

---

Question Type: MultipleChoice

---

The link quality of a company's network is poor, often failures lead to route oscillation, and even occasionally there are routing loops, in order to prevent the recurrence of these phenomena, the network administrator decided to deploy URPF in the whole network to improve the stability of the network

Options:

---

- A- True
- B- False

Answer:

---

A

## Question 9

---

Question Type: MultipleChoice

---

The Serial Number field of LS is used to detect expired and duplicate LSAs. The field is a 32bit signed integer, so the small serial number is 0x8000000

Options:

---

- A- True
- B- False

Answer:

B

## Question 10

Question Type: MultipleChoice

The message types of ISIS mainly include SNP, IIH, and LSP

Options:

- A- True
- B- False

Answer:

A

## Question 11

Question Type: MultipleChoice

MPLS does not enable the secondary unsubject pop-up, the penultimate hop label can be the same as

Options:

- A- TRUE
- B- FALSE

Answer:

B
