Question 1

Question Type: MultipleChoice

Case Study: Mix Questions

Mix Questions

AZ-140 Mix Questions IN THIS CASE STUDY

You are designing an Azure Virtual Desktop deployment.

You identify the network latency between the locations where users reside and the planned deployment.

What should you use to identify the best Azure region to deploy the host pool?

Options:

- A- Azure Traffic Manager
- B- Azure Virtual Desktop Experience Estimator
- C- Azure Monitor for Azure Virtual Desktop
- D- Azure Advisor

Answer:

B

Explanation:

<https://azure.microsoft.com/en-gb/services/virtual-desktop/assessment/>

Question 2

Question Type: MultipleChoice

You have a Windows Virtual Desktop deployment.

You publish a RemoteApp named AppVersion1.

You need AppVersion1 to appear in the Remote Desktop client as Sales Contact Application.

Which PowerShell cmdlet should you use?

Options:

- A- New-AzADApplication
- B- Update-AzWvdApplicationGroup
- C- Register-AzWvdApplicationGroup
- D- Update-AzWvdApplication

Answer:

A

Explanation:

<https://docs.microsoft.com/en-us/azure/virtual-desktop/customize-feed-for-virtual-desktop-users>

<https://docs.microsoft.com/en-us/powershell/module/az.desktopvirtualization/update-azwvdapplication?view=azps-5.7.0>

Question 3

Question Type: MultipleChoice

You have the devices shown in the following table.

Name	Operating system
Device1	Windows 10 Home
Device2	Windows 8.1 Professional
Device3	Windows 10 IoT Enterprise

You plan to deploy Windows Virtual Desktop for client access to remove virtualized apps.

Which devices support the Remote Desktop client?

Options:

- A- Device1 and Device2 only
- B- Device1 and Device3 only
- C- Device1, Device2, and Device3
- D- Device1 only

Answer:

B

Explanation:

<https://docs.microsoft.com/en-us/windows-server/remote/remote-desktop-services/clients/windowsdesktop>

Applies to: Windows 10, Windows 10 IoT Enterprise, and Windows 7

You can use the Remote Desktop client for Windows Desktop to access Windows apps and desktops remotely from a different Windows device.

The new Remote Desktop client (MSRDC) supports Windows 10, Windows 10 IoT Enterprise, and Windows 7 client devices:

Windows 64-bit

Windows 32-bit

Windows ARM64

Question 4

Question Type: MultipleChoice

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have an Azure Virtual Desktop deployment.

You need to ensure that users are signed out automatically when they disconnect from a session.

Solution: From the Local Group Policy Editor, you configure the Session Time Limits settings.

Does this meet the goal?

Options:

A- Yes

B- No

Answer:

A

Question 5

Question Type: MultipleChoice

You have an Azure Virtual Desktop deployment that contains a host pool named Pool1. You plan to create a Windows 10 image named Image1 to deploy new session hosts to Pool1.

You need to ensure that all the new session hosts deployed by using Image1 are onboarded to Microsoft Defender for Endpoint. What should you do?

Options:

A- Add a Defender for Endpoint onboarding script to image1, and then run the script at first start.

B- Create an MSIX package for Pool1.

C- Run a Defender for Endpoint onboarding script on Image1. and then run sysprep.

D- Create an automation task for Pool1.

Answer:

A

Question 6

Question Type: MultipleChoice

You have a Azure Virtual Desktop deployment that uses Microsoft 355 cloud services including Microsoft Teams.

Users use the Remote Desktop client to connect to the deployment from computers that run Windows 10

You need to support audio and video in Azure Virtual Desktop and provide the users with access to Microsoft Teams calling and meeting features.

Which three actions should you perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

Options:

- A- Install the Microsoft Teams WebSocket Service on the Windows 10 computers
- B- Configure the IsVWDEnvironment registry key on the Windows 10 computers
- C- Configure the isWVDEnvironment registry key on the virtual machines
- D- Install the Microsoft Teams desktop app on the Windows 10 computers
- E- Install the Microsoft Teams WebSocket Service on the virtual machines
- F- Install the Microsoft Teams desktop app on the virtual machines

Answer:

B, D, E

Explanation:

<https://docs.microsoft.com/en-us/azure/virtual-desktop/teams-on-avd>

Question 7

Question Type: MultipleChoice

You have an Azure subscription that contains an Azure Virtual Desktop host pool. The host pool uses FSLogix profile containers.

You need to create a configuration file to prevent specific folders from syncing to the FSLogix profile containers when a user signs out.

How should you name the file?

Options:

- A- redirections.xml
- B- fslogix.config
- C- folders.json
- D- profile.xml

Answer:

A

Question 8

Question Type: MultipleChoice

You have an Azure Virtual Desktop deployment that contains a host pool named Pool1

Pool1 contains two session hosts that are Microsoft Entra joined.

You need to configure single sign-on (SSO) to connect to the session hosts. The solution must enable Microsoft Entra authentication for Remote Desktop Protocol (RDP) in the Microsoft Entra tenant.

Which application requires that you modify the remoteDesktopSecurityConfiguration object?

Options:

- A- Windows 365
- B- Azure Virtual Desktop
- C- Windows Cloud Login
- D- Microsoft Azure Windows Virtual Machine Sign-in

Answer:

C

Question 9

Question Type: MultipleChoice

You need to configure the user settings of Admin1 to meet the user profile requirements.

What should you do?

Options:

- A- Modify the membership of the FSLogix ODFC Exclude List group.
- B- Modify the membership of the FSLogix Profile Exclude List group.
- C- Modify the HKLM\SOFTWARE\FSLogix\Profiles registry settings.

D- Modify the HKLM\SOFTWARE\FSLogix\ODFC registry settings.

Answer:

B

Explanation:

<https://docs.microsoft.com/en-us/fslogix/overview>

<https://docs.microsoft.com/en-us/fslogix/configure-profile-container-tutorial#set-up-include-and-exclude-usergroups>
