Question 1

Question Type: DragDrop

Case Study: Mix Questions

Mix Questions

MB-500 Mix Questions IN THIS CASE STUDY

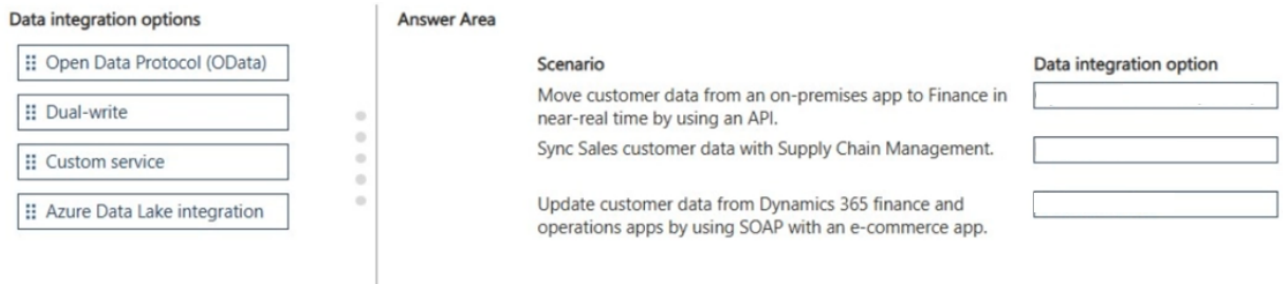

A company uses Dynamics 365 Finance and Dynamics 365 Supply Chain Management.

The company plans to integrate Dynamics 365 Sales customer data with Finance and Supply Chain Management.

You need to integrate the data.

Which data integration option should you select for each scenario? To answer, drag the appropriate data integration options to the correct scenarios. Each data integration option may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Answer:

See the Answer in the Premium Version!

Question 2

Question Type: MultipleChoice

You need to add data to the WHSTmpStatusChange table by extending the insert method.

What should you do?

Options:

A- Right-click the WHSTmpStatusChange table in the Application Object Tree (AOT) and select View Code
B- Right-click the project node in Solution Explorer and add a new Class object to the project.
C- Right-click the WHSTmpStatusChange table in the Application Object Tree (AOT) and create an extension in the existing project
D- Right-click the project node in Solution Explorer and add a new Table object to the project.

Answer:

C

Question 3

Question Type: MultipleChoice

A company uses Dynamics 365 Finance.

You must create a process that updates the following:

* A single record for customer number A0001 in the customer table.

* The value of its customer group to 10.

You need to implement the process. Which code segment should you use?

A.

```
A. select forupdate custTable   where custTable.AccountNum == 'A0001';
   custTable.CustGroup = '10';
   custTable.update();
```

B.

```
select custTable   where custTable.AccountNum == 'A0001';
custTable.CustGroup = '10'; custTable.update();
ttscommit;
```

C.

```
select forupdate custTable; ttsbegin; custTable.CustGroup = '10';
custTable.update();
ttscommit;
```

D.

```
select forupdate custTable where custTable.AccountNum == 'A0001';
ttsbegin; custTable.CustGroup = '10';
custTable.update();
ttscommit;
```

Options:

A- Option A
B- Option B
C- Option C
D- Option D

Answer:

D

Question 4

Question Type: MultipleChoice

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You are adding a new field to the SalesTable form.

You must use an extension to add a status field onto the form.

Answer Area

Environment types	Tool	Environment type
User Acceptance Testing (UAT) only	Activity Monitoring	
Build only	SQL Insights	
User Acceptance Testing (UAT) and Build	System Diagnostics	

You need to create the extension in the Application Object Tree (AOT) and add the extension to the demoExtensions model.

Solution: Add a new form object to the project and name the form SalesTable.Extension.

Does the solution meet the goal?

Options:

A- Yes
B- No

Answer:

B

Explanation:

Instead navigate to the user interface forms section for the SalesTable form and create an extension.

Note: In Dynamics 365 Finance and Operations, the new fields will need to be added via a table extension. Create the extensions on the SalesTable.

Question 5

Question Type: MultipleChoice

A company uses Dynamics 365 finance and operations apps.

A customer wants to ensure future customizations or application upgrades do not interfere with or interrupt business process steps. The customer must document the business process steps a user performs in the user interface.

You need to select the options for exporting a task recording for testing.

Which three options could you select? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

Options:

A- Generate Test Execution files only

B- Save as developer recording
C- Export as Word document
D- Save to Lifecycle Services
E- Create derived test case

Answer:

B, C, D

Question 6

Question Type: MultipleChoice

A company uses Dynamics 365 Finance.

You have an entity named Vend Vend orV2 Entity. You add a new column to the entity. You need to ensure that the new column is available in the entity for data transfer activity. Which two actions should you perform? Each correct answer presents part of the solution. NOTE; Each correct selection is worth one point.

Options:

A- Select the Modify target mapping button on the Entity list page.
B- Select the Generate mapping button on the Mapping details form.
C- Select the Entity structure button on the Entity page.
D- Select the Validate button on the Entity list page.

Answer:

B, D

Question 7

Question Type: MultipleChoice

You extend the insert method of the CustTable by using Chain of Command.

You need to print a message after creating a record if the Sales tax group is complete.

Which code segment should you use?

A)

```
[ExtensionOf(tableStr(CustTable))]
final class CustTable_Extension
{
    void insert(DirPartyType _partyType, Name _name, boolean _updateCRM)
    {

        try
        {
            if (!this.TaxGroup)
            {
                throw Exception::Error;
            }
        }
        catch (Exception::Error)
        {
            throw error('An error ocurred');
        }
        finally
        {
            info('The customer has a sales tax group.');

            next insert(_partyType, _name, _updateCRM);
        }

    }
}
```

B)

```
[ExtensionOf(tableStr(CustTable))]
final class CustTable_Extension
{
    void insert(DirPartyType _partyType, Name _name, boolean _updateCRM)
    {
        next insert(_partyType, _name, _updateCRM);

        if (!this.TaxGroup)
        {
            info('The customer has a sales tax group.');
        }

    }
}
```

C)

```
[ExtensionOf(tableStr(CustTable))]
final class CustTable_Extension
{
    void insert(DirPartyType _partyType, Name _name, boolean _updateCRM)
    {
        if (this.TaxGroup)
        {
            info('The customer has a sales tax group.');
        }

        next insert(_partyType, _name, _updateCRM);
    }
}
```

D)

```
[ExtensionOf(tableStr(CustTable))]
final class CustTable_Extension
{
    void insert(DirPartyType _partyType, Name _name, boolean _updateCRM)
    {
        next insert(_partyType, _name, _updateCRM);

        if (this.TaxGroup)
        {
            info('The customer has a sales tax group.');
        }
    }
}
```

Options:

A- Option A
B- Option B
C- Option C
D- Option D

Answer:

B

Question 8

Question Type: MultipleChoice

You ate Dynamics 365 Finance developer.

You need lo initialize an embedded Microsoft Power Bl report.

Which code segment should you add to the form initialization method?

A.

```
deployOrUpdateReport(powerBIConfiguration, reportName, resourceName)
```

B.

```
initializeReportControlInternal(powerBIConfiguration, reportParameters, reportControl, showError)
```

C.

```
importAndStoreReport(powerBICongifuration, resourceName, isUpdate)
```

D.

```
initializeCustomReportControl(resourceName, formGroupControl, reportCustomParams)
```

Options:

A- Option A
B- Option B
C- Option C
D- Option D

Answer:

D
