Question Type: Hotspot

Case Study: Mix Questions

Mix Questions

MD-102 Mix Questions IN THIS CASE STUDY

You have a Microsoft 365 subscription.

All users have Microsoft 365 apps deployed.

You need to configure Microsoft 365 apps to meet the following requirements:

- * Enable the automatic installation of WebView2 Runtime.
- * Prevent users from submitting feedback.

Which two settings should you configure in the Microsoft 365 Apps admin center? To answer, select the appropriate settings in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Answer:

See the Answer in the Premium Version!

Question 2

Question Type: OrderList

Your network contains an Active Directory domain.

You install the Microsoft Deployment Toolkit (MDT) on a server.

You have a custom image of Windows 11.

You need to deploy the image to 100 devices by using MDT.

Which three actions should you perform in sequence? To answer, move answer area and arrange them in the correct order.

Actions	Answer Area
Enable multicast.	
Install Windows Deployment Services (WDS).	>
Create a deployment share.	<
Add the Windows 11 image.	
Create a task sequence.	

Answer:

Install Windows Deployment Services (WDS) Create a deployment share. Add the Windows 11 image.

Question 3

Question Type: MultipleChoice

You have a Microsoft 365 subscription.

You have 10 computers that run Windows 10 and are enrolled in mobile device management (MDM).

You need to deploy the Microsoft 365 Apps for enterprise suite to all the computers.

What should you do?

Options:

- A- From the Microsoft Intune admin center, create a Windows 10 device profile.
- B- From Azure AD, add an app registration.
- C- From Azure AD, add an enterprise application.
- D- From the Microsoft Intune admin center, add an app.

Answer:

D

Explanation:

To deploy Microsoft 365 Apps for enterprise to Windows 10 devices that are enrolled in Intune, you need to add an app of type "Windows 10 app (Win32)" in the Microsoft Intune admin center and configure the app settings. You can then assign the app to groups of users or devices. Reference: <https://docs.microsoft.com/en-us/mem/intune/apps/apps-win32-app-management>

Question 4

Question Type: OrderList

You have a Microsoft Deployment Toolkit (MDT) server named MDT1.

When computers start from the LiteTouchPE_x64.iso image and connect to MDT1, the welcome screen appears as shown In the following exhibit.

You need to prevent the welcome screen from appearing when the computers connect to MDT1.

Which three actions should you perform in sequence? To answer move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions	Answer Area
Modify the task sequence.	
Replace the ISO image.	
Modify the Bootstrap.ini file.	
Modify the CustomSettings.ini file.	
Update the deployment share.	

< >
< >

Answer:

Modify the Bootstrap.ini file.Modify the CustomSettings.ini file.Update the deployment share.

Question 5

Question Type: MultipleChoice

You have a Microsoft Azure subscription that contains an Azure Log Analytics workspace.

You deploy a new computer named Computer1 that runs Windows 10. Computer1 is in a workgroup.

You need to ensure that you can use Log Analytics to query events from Computer1.

What should you do on Computer1?

Options:

- A- Join Azure AD.
- B- Configure Windows Defender Firewall
- C- Create an event subscription.
- D- Install the Azure Monitor Agent.

Answer:

D

Question 6

Question Type: OrderList

You need to meet the technical requirements for the LEG department computers.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions	Answer Area
Configure the commercial ID on the LEG department computers.	
Create an Azure Machine Learning service workspace.	
Create an Azure Log Analytics workspace.	☐
Install the Microsoft Monitoring Agent on the LEG department computers.	☐
Add a solution to a workspace.	

Answer:

Create an Azure Log Analytics workspace. Add a solution to a workspace. Configuration the commercial ID on the LEG department computers.

Explanation:

<https://docs.microsoft.com/en-us/windows/deployment/update/windows-analytics-azure-portal>

Question 7

Question Type: MultipleChoice

You need to prepare for the deployment of the Phoenix office computers.

What should you do first?

Options:

A- Extract the hardware ID information of each computer to a CSV file and upload the file from

the Devices settings in Microsoft Store for Business.

B- Generalize the computers and configure the Mobility (MDM and MAM) settings from the Azure Active

Directory blade in the Azure portal.

C- Generalize the computers and configure the Device settings from the Azure Active Directory blade in the Azure portal.

D- Extract the hardware ID information of each computer to an XLSX file and upload the file from the Devices settings in Microsoft Store for Business.

Answer:

A

Explanation:

<https://docs.microsoft.com/en-us/microsoft-store/add-profile-to-devices#manage-autopilot-deployment-profiles>

Question 8

Question Type: OrderList

You have a Microsoft Deployment Toolkit (MDT) deployment share named DS1.

You import a Windows 11 image to DS1.

You have an executable installer for an application named App1.

You need to ensure that App1 will be installed for all the task sequences that deploy the image.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions		Answer Area		
Modify a Windows 11 operating system setting.	> <	1	Add App1 to DS1.	↑ ↓
Modify a selection profile.		2	Identify the GUID of App1.	
Add App1 to DS1.		3	Modify CustomSettings.ini.	
Identify the GUID of App1.				
Modify CustomSettings.ini.				

Answer:

Add App1 to DS1. Identify the GUID of App1. Modify CustomSettings.ini.

Question 9

Question Type: MultipleChoice

You have a Microsoft 365 E5 subscription.

You use Microsoft Intune to manage all devices.

You need to prepare a Win32 app named App1.exe for deployment.

What should you do first?

Options:

- A- Upload App1 exe to Azure Blob Storage.
- B- From the Microsoft Intune admin center, create an app configuration policy.
- C- From the Microsoft 365 Apps admin center, create a deployment configuration.
- D- Package App1.exe in the INTUNEWIN format.

Answer:

D

Question 10

Question Type: OrderList

You have a Microsoft 365 subscription that contains 1,000 Windows 11 devices enrolled in Microsoft Intune.

You plan to create and monitor the results of a compliance policy used to validate the BIOS version of the devices.

Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions	Answer Area
Review the compliance dashboard for results.	
Create and assign a compliance policy that has System Security settings configured.	
Review the Conditional Access Insights and Reporting workbook for results.	
Create a PowerShell discovery script and a JSON file.	
Upload the PowerShell script to Intune.	
Upload the JSON file to Azure AD.	
Create and assign a custom compliance policy.	

Answer:

Create a PowerShell discovery script and a JSON file. Upload the PowerShell script to Intune. Upload the JSON file to Azure AD. Create and assign a custom compliance policy.

Question 11

Question Type: MultipleChoice

You have a Microsoft 365 ES subscription.

You use Microsoft Intune to manage all devices.

You need to prepare a Win32 app named Appl.exe for deployment.

What should you do first?

Options:

- A- From the Microsoft Intune admin center, create an app configuration policy.
- B- Change App1.exe to the INIUNEW1N format.
- C- From the Microsoft 365 Apps admin center, create a deployment configuration
- D- Upload App1 exe to Azure Blob Storage.

Answer:

B
