Question 1

Question Type: MultipleChoice

Which of the following capabilities does test management in SAP Cloud ALM for Implementation provide? Note: There are 2 correct answers to this question.

Options:

- A- Manual and Automated Testing
- B- Load and Volume Testing
- C- Test Plans
- D- Test Data Container

Answer:

A, C

Explanation:

SAP Cloud ALM for Implementation supports both manual and automated testing as well as test plans to manage and execute test scenarios effectively. These features help ensure comprehensive test coverage for new implementations.

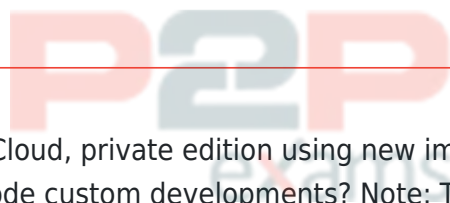

Question 2

Question Type: MultipleChoice

When deploying SAP S/4HANA Cloud, private edition using new implementation, which of the following is recommended to code custom developments? Note: There are 2 correct answers to this question.

Options:

- A- SAP Support Portal
- B- SAP Business Technology Platform
- C- SAP ABAP Workbench
- D- SAP Best Practices

Answer:

B, C

Explanation:

For custom developments in SAP S/4HANA Cloud, private edition, SAP Business Technology Platform provides the environment for side-by-side extensibility, while SAP ABAP Workbench supports in-app custom development within the system.

Question 3

Question Type: MultipleChoice

What is the difference between the System Conversion and New Implementation transition paths to SAP S/4HANA? Note: There are 2 correct answers to this question.

Options:

- A- Custom code is developed in System Conversion and adjusted in New Implementation of SAP S/4HANA in the Realize phase.
- B- Custom code is adjusted in System Conversion and developed in New Implementation of SAP S/4HANA in the Realize phase.
- C- Data is converted in System Conversion and migrated in New Implementation of SAP S/4HANA in the Realize phase.
- D- Data is migrated in System Conversion and converted in New Implementation of SAP S/4HANA in the Realize phase.

Answer:

B, C

Explanation:

In System Conversion, custom code is adjusted to align with SAP S/4HANA requirements, while in New Implementation, custom code is developed anew. Additionally, data is converted in System Conversion, whereas in New Implementation, data is migrated from the legacy system.

Question 4

Question Type: MultipleChoice

A customer with an existing SAP S/4HANA solution is exploring the best approach to move without changing their landscape into the cloud. Which is the most suitable option for the customer?

Options:

- A- Selective Data Transition
- B- System Conversion
- C- Lift and Shift
- D- Mix and Match

Answer:

C

Explanation:

Lift and Shift is the preferred approach for customers aiming to move an existing SAP S/4HANA system to the cloud with minimal changes to their current landscape. This option focuses on infrastructure relocation rather than system transformation.

Question 5

Question Type: MultipleChoice

When performing an SAP Readiness Check in system conversion, what areas are covered within the result? Note: There are 3 correct answers to this question.

Options:

- A- Active business functions
- B- Recommended SAP Fiori apps
- C- SAP and third-party interfaces
- D- Sizing for SAP S/4HANA
- E- Complete list of possible simplification items

Answer:

A, B, E

Explanation:

The SAP Readiness Check covers areas including active business functions, recommended SAP Fiori apps, and simplification items. It helps organizations assess the current system's compatibility and requirements for conversion to SAP S/4HANA.

Question 6

Question Type: MultipleChoice

What is the preferred option to migrate to SAP S/4HANA Cloud, private edition while keeping most of the original processes and adding new configuration?

Options:

- A- Mix and Match
- B- System Conversion
- C- Shell Conversion
- D- New Implementation

Answer:

C

Explanation:

Shell Conversion allows for the migration of SAP S/4HANA Cloud, private edition, by bringing over most original processes while adding new configurations as needed, without a complete system overhaul.

Question 7

Question Type: MultipleChoice

Which of the following are capabilities of SAP Landscape Transformation Tool used in Selective Data Transition scenarios? Note: There are 3 correct answers to this question.

Options:

- A- Migration of selected applications
- B- Migration of business units
- C- Configuration of open backlog items
- D- Consolidation of systems
- E- Full set of historical transactional data

Answer:

A, B, D

Explanation:

The SAP Landscape Transformation Tool enables selective migration by allowing the migration of specific applications and business units, as well as the consolidation of systems. It provides flexibility in data transition for selective data migration scenarios.

Question 8

Question Type: MultipleChoice

Your customer is using a non-SAP ERP system and decides to deploy SAP S/4HANA

Options:

- A- Which of the following options are available to your customer? Note: There are 3 correct answers to this question.
- A- System Conversion SAP S/4HANA
- B- New Implementation SAP S/4HANA Cloud, private edition
- C- New Implementation SAP S/4HANA
- D- System Conversion SAP S/4HANA Cloud, private edition
- E- New Implementation SAP S/4HANA Cloud, public edition

Answer:

B, C, E

Explanation:

For customers migrating from a non-SAP ERP system, New Implementation paths, such as SAP S/4HANA Cloud (both public and private editions) or SAP S/4HANA on-premise, are viable options. System Conversion is not applicable as it is only for transitioning from an existing SAP ERP system.

Question 9

Question Type: MultipleChoice

Which of the following is used to perform configuration in SAP S/4HANA Cloud, private edition?

Options:

- A- SAP Central Business Configuration
- B- Self Service Configuration UIs (SSCUIs)
- C- IMG (Implementation Guide)
- D- SAP Solution Manager

Answer:

C

Explanation:

In SAP S/4HANA Cloud, private edition, configuration is primarily performed using the IMG (Implementation Guide), which allows for in-depth system customization similar to on-premise systems.

Question 10

Question Type: MultipleChoice

What findings do you document in the Explore Phase Fit-to-standard workshops? Note: There are

3 correct answers to this question.

Options:

- A- Detailed design of extensions
- B- Process models
- C- Key business decisions
- D- Key user documentation
- E- Confirmation of scope

Answer:

B, C, E

Explanation:

In the Fit-to-Standard workshops during the Explore phase, findings such as process models, key business decisions, and confirmation of scope are documented. These outputs form the basis for the subsequent configuration and development efforts.

Question 11

Question Type: MultipleChoice

In which phase do you verify the SAP Best Practices content that meets the customer's business needs, and capture delta requirements? Note: There are 2 correct answers to this question.

Options:

- A- Discovery
- B- Explore
- C- Prepare
- D- Realize

Answer:

B

Explanation:

During the Explore phase, SAP Best Practices content is verified against the customer's business needs, and any delta requirements are captured to tailor the solution. This phase ensures alignment with business requirements before configuration.

Question 12

Question Type: MultipleChoice

When applying a cloud mindset in a greenfield implementation, which of the following should you consider? Note: There are 2 correct answers to this question.

Options:

- A- Use supported extensibility technologies
- B- Use quality gates
- C- Ensure transparency on deviations
- D- Use SAP Digital Discovery Assessment

Answer:

A, C

Explanation:

In a greenfield implementation, a cloud mindset involves using supported extensibility technologies to minimize customizations and ensure that any deviations are transparently managed. This approach ensures scalability and alignment with cloud standards.
