Answer:

A, C

Question 3

Question Type: MultipleChoice

SAP Fiori Elements utilizes a metadata-driven approach for SAP Fiori app development. What are the implications of this?

Options:

- A- SAPUI5 Smart Controls must be created by developers to utilize the OData annotations and metadata of SAP Fiori Elements templates.
- B- The SAPUI5 runtime interprets metadata and annotations of the OData service and uses the corresponding views for the Fiori app at startup.

- C- Smart Templates must be used by the developer to consume OData annotations and metadata so the SAPUI5 runtime can use the corresponding view.
- D- App developers must use JavaScript to allow their applications to read OData annotations and metadata

Answer:

B

Question 4

Question Type: MultipleChoice

Which features of the SAP Business Application Studio help you extend a standard SAP Fiori app?
Note: There are 2 correct answers to this question.

Options:

- A- A wizard to generate the files for each extension possibility
- B- The Extensibility Pane to choose extension points
- C- An editor to modify the data model in the extended project
- D- The Descriptor Editor to choose elements for extension

Answer:

A, B

Question 5

Question Type: MultipleChoice

You develop an SAPUI5 app that can be extended. To allow your customer to customize notifications, you set up a hook method. What activities are required to implement a hook method? Note: There are 3 correct answers to this question.

Options:

- A- Add a code snippet to check if the method exists and execute it
- B- Create a ifile in the Util folder to allow the customer to add custom code.
- C- Modify the bootstrap option to allow multi-layer extensions of the custom code.

- D- Identify a strategic location in the controller for the customized code
- E- Define a new function name ensuring it is reserved for the extension.

Answer:

A, D, E

Question 6

Question Type: MultipleChoice

You need to configure an SAP Destination service to enable SAP Business Application Studio to extend an existing SAP Fiori app. Which configuration setting for the WebIDE Usage property is required?

Options:
