Answer:

D

Question 6

Question Type: MultipleChoice

An administrator is tasked with creating a new vSphere and NSX cloud template for the App-Dev team. The administrator successfully configures multiple network profiles that will create different types of on demand networks. The App-Dev team wants the cloud template to create an on-demand network that can be connected externally.

Which two network types should the administrator consider using in the cloud template? (Choose two.)

Options:

A- Existing
B- Public
C- Outbound
D- Private
E- Routed

Answer:

C, E

Question 7

Question Type: MultipleChoice

What are three advantages of using vRealize Automation Cloud over vRealize Automation on-premises? (Choose three.)

Options:

A- The ability to run action based extensibility (ABX)
B- Support for deploying workloads to public clouds
C- Does not require any additional components to deploy and manage on-premises workloads
D- License key is not required
E- Earlier access to new features
F- Reduce infrastructure maintenance and patching time

Answer:

A, B, E
