Question 1

Question Type: MultipleChoice

As FusionSphere, the disk thin provisioning can be achieved is (multiple choice)

Options:

- A-** thin provisioning and virtual storage operating system, hardware has nothing to do, so as long as the use of virtual image management system, will be able to achieve disk thin provisioning
- B-** does not currently support NTFS formatted virtual machine disk recovery // NTFS does not support online recovery
- C-** providing virtual disk space monitoring and recovery features
- D-** to provide data storage capacity warning threshold may be set, generating a warning when the storage capacity exceeds the threshold value

Answer:

A, C, D

Question 2

Question Type: MultipleChoice

The main purpose on open NUMA functions are correct is ()

Options:

A- optimize memory access performance of the virtual machine

Computing capacity B. to maximize the physical host CPU

C- to maximize the physical memory of the machine multiplexing rate

VCPU computing power of D. maximize virtual machine

Answer:

A

Question 3

Question Type: MultipleChoice

As FusionCompute, which one of the following options do not belong CPU resources QoS parameters?

Options:

- A- CPU share of resources
- B- CPU resource limits
- C- CPU resource reservation
- D- CPU resource reuse

Answer:

D

Question 4

Question Type: MultipleChoice

In Huawei FusionCompute, the tools installed for the virtual machine have nothing to do with the type and version of the operating system used by the virtual machine // System-dependent

Options:

- A- TRUE

B- FALSE

Answer:

B

Question 5

Question Type: MultipleChoice

In the following description, in line with the characteristics of the virtual package (multiple) the

Options:

- A-** The configuration file of the virtual machine contains information such as CPU type and quantity.
- B-** Virtual machines can be migrated from one physical host to another
- C-** Multiple virtual machines can run on one physical host at the same time
- D-** If a virtual machine has multiple hard disks, each hard disk will generate a corresponding disk file

Answer:

A, B, D

Question 6

Question Type: MultipleChoice

RAID 6 on the basis of enhanced RAID 5 disk fault tolerance, can allow two disk failures, but not less than the number of disks required 4

Options:

A- TRUE

B- FALSE

Answer:

A
