Question 1

Question Type: MultipleChoice

An Okta Administrator is instructed to assign an application to 1,000 users in the Sales department Is this a recommended method for the administrator to assign the application to the users

Solution Assign the application to an Active Directory organizational unit

Options:

A) Yes

B) No

Answer:

B

Question 2

Question Type: MultipleChoice

Is this a valid group type supported in Okta

Solution Okta group

Options:

A) Yes

B) No

Answer:

A

Question 3

Question Type: MultipleChoice

An employee who has left a company used an application that does NOT support lifecycle management. Is this a task generated by Okta to remind the administrator to offboard the employee

Solution End user activity task

Options:

A) Yes

B) No

Answer:

B

Question 4

Question Type: MultipleChoice

An employee who has left a company used an application that does NOT support lifecycle management. Is this a task generated by Okta to remind the administrator to offboard the employee

Solution Deprovisioning task

Options:

A) Yes

B) No

Explanation

Employee leaves an organization

As employees leave an organization, a process can be initiated by various departments to deactivate users. The user account needs to be deactivated. Deprovisioning deactivates the user account from the Okta Universal Directory. Deprovisioning ensures that persons who are no longer in your organization do not have access to sensitive applications and data.

You can deprovision users in Okta or from an external user store, such as AD or a CRM app, such as Salesforce. Typically, user deactivation is triggered from an external user store and it flows into Okta. In any case, deactivated users are automatically deprovisioned from supported apps. Admins receive an email describing any apps that require them to manually deprovision from users. <https://help.okta.com/enprod/content/topics/provisioning/lcm/lcm-lifecycle-event-triggers.htm>

Answer:

A

Question 5

Question Type: MultipleChoice

Is this a valid reason to choose Okta as an Identity and Access Management (IAM) solution

Solution To securely connect users to applications In minutes with out of the box integrations for thousands of cloud onpremise, and mobile apps

Options:

A) Yes

B) No

Answer:

B

Question 6

Question Type: MultipleChoice

An employee who has left a company used an application that does NOT support lifecycle management. Is this a task generated by Okta to remind the administrator to offboard the employee

Solution Deprovisioning task

Options:

A) Yes

B) No

Explanation

Employee leaves an organization

As employees leave an organization, a process can be initiated by various departments to deactivate users. The user account needs to be deactivated. Deprovisioning deactivates the user account from the Okta Universal Directory. Deprovisioning ensures that persons who are no longer in your organization do not have access to sensitive applications and data.
