Question 1

Question Type: MultipleChoice

A university is planning to set up an identity solution for its alumni. A third-party identity provider will be used for single sign-on. Salesforce will be the system of records. Users are getting error messages when logging in.

Which Salesforce feature should be used to debug the issue?

Options:

- A- Apex Exception Email
- B- View Setup Audit Trail
- C- Debug Logs
- D- Login History

Answer:

D

Question 2

Question Type: MultipleChoice

An insurance company has a connected app in its Salesforce environment that is used to integrate with a Google Workspace (formerly known as G Suite).

An identity and access management (IAM) architect has been asked to implement automation to enable users, freeze/suspend users, disable users, and reactivate existing users in Google Workspace upon similar actions in Salesforce.

Which solution is recommended to meet this requirement?

Options:

- A-** Configure user Provisioning for Connected Apps.
- B-** Update the Security Assertion Markup Language Just-in-Time (SAML JIt; handler in Salesforce for user provisioning and de-provisioning.
- C-** Build a custom REST endpoint in Salesforce that Google Workspace can poll against.
- D-** Build an Apex trigger on the userlogin object to make asynchronous callouts to Google APIs.

Answer:

A

Question 3

Question Type: MultipleChoice

Universal Containers is creating a web application that will be secured by Salesforce Identity using the OAuth 2.0 Web Server Flow (uses the OAuth 2.0 authorization code grant type).

Which three OAuth concepts apply to this flow?

Choose 3 answers

Options:

- A- Verification URL
- B- Client Secret
- C- Access Token
- D- Scopes

Answer:

B, C, D

Question 4

Question Type: MultipleChoice

An administrator created a connected app for a custom web application in Salesforce which needs to be visible as a tile in App Launcher. The tile for the custom web application is missing in the app launcher for all users in Salesforce. The administrator requested assistance from an identity architect to resolve the issue.

Which two reasons are the source of the issue?

Choose 2 answers

Options:

- A- StartURL for the connected app is not set in Connected App settings.
- B- OAuth scope does not include 'openid*'.
- C- Session Policy is set as 'High Assurance Session required' for this connected app.
- D- The connected app is not set in the App menu as 'Visible in App Launcher'.

Answer:

A, C

Question 5

Question Type: MultipleChoice

Northern Trail Outfitters (NTO) recently purchased Salesforce Identity Connect to streamline user provisioning across Microsoft Active Directory (AD) and Salesforce Sales Cloud.

NTO has asked an identity architect to identify which salesforce security configurations can map to AD permissions.

Which three Salesforce permissions are available to map to AD permissions?

Choose 3 answers

Options:

- A- Public Groups
- B- Field-Level Security
- C- Roles
- D- Sharing Rules
- E- Profiles and Permission Sets

Answer:

A, C, E

Question 6

Question Type: MultipleChoice

An identity architect is setting up an integration between Salesforce and a third-party system. The third-party system needs to authenticate to Salesforce and then make API calls against the REST API.

One of the requirements is that the solution needs to ensure the third party service providers connected app in Salesforce mini need for end user interaction and maximizes security.

Which OAuth flow should be used to fulfill the requirement?

Options:

- A- JWT Bearer Flow
- B- Web Server Flow
- C- User Agent Flow
- D- Username-Password Flow

Answer:

A

Question 7

Question Type: MultipleChoice

Northern Trail Outfitters (NTO) uses Salesforce for Sales Opportunity Management. Okta was recently brought in to Just-in-Time (JIT) provision and authenticate NTO users to applications. Salesforce users also use Okta to authorize a Forecasting web application to access Salesforce records on their behalf.

Which two roles are being performed by Salesforce?

Choose 2 answers

Options:

A- SAML Identity Provider

B- OAuth Client

C- OAuth Resource Server

D- SAML Service Provider

Answer:

B, D

Question 8

Question Type: MultipleChoice

A multinational industrial products manufacturer is planning to implement Salesforce CRM to manage their business. They have the following requirements:

1. They plan to implement Partner communities to provide access to their partner network .
2. They have operations in multiple countries and are planning to implement multiple Salesforce orgs.
3. Some of their partners do business in multiple countries and will need information from multiple Salesforce communities.
4. They would like to provide a single login for their partners.

How should an Identity Architect solution this requirement with limited custom development?

Options:

A- Create a partner login for the country of their operation and use SAML federation to provide access to other orgs.

- B-** Consolidate Partner related information in a single org and provide access through Salesforce community.
- C-** Allow partners to choose the Salesforce org they need information from and use login flows to authenticate access.
- D-** Register partners in one org and access information from other orgs using APIs.

Answer:

A

Question 9

Question Type: MultipleChoice
