Question 1

You are the administrator for a Novell NetWare network. You have just copied the TMSP.mib file to the Manage Wise directory. What type of alert is associated with this action?

Options:

A- Red Alert

B- Outbreak Alert

C- SNMP Trap Alert

D- Insufficient Privileges Alert

E- NetWare Send Message Alert

F- Management Information Alert

Answer:

C

Question 2

You are the network administrator for a small company. There are only four members on your IT team, and budget constraints keep you from having a full-time IT staff member onsite over the weekends.

You purchase a numeric pager for the team and create a rotating schedule for each of you to be on call one weekend a month. You want whichever member is on-call to be notified of any virus outbreaks on your network. How can you configure this?

Options:

A- in the Standard Alert options, select Pager and specify the Pager Server to dial the on-call pager

B- in the Outbreak Alert options, select Pager and specify the Pager Server to dial the on-call pager

C- in the Do menu, select Outbreak Alert, select Pager and specify the Pager Server to dial the on-call pager

D- in the Standard Alert options, select Internet email and specify for the mail server to send a message to the email address of the network administrator

E- in the Outbreak Alert options, select Internet email and specify for the mail server to send a message to the email address of the network administrator

F- in the Do menu, select Outbreak Alert, select Internet email and specify for the mail server to send a message to the email address of the network administrator

Answer:

B

Question 3

Question Type: MultipleChoice

You can configure Server Protect to notify you for which two events? (Choose two.)

Options:

A- when the virus program is out of date

B- when a new program version is available

C- when it is time to install a new Information Server

D- when a service has been stopped due to abnormalities

E- when there is an attempt to modify a write-protected file

Answer:

A, E

Question 4

An infected file is detected in the temp directory which cannot be cleaned or deleted. You attempt to move the file to the Quarantine folder but the process failed. What is the reason?

Options:

A- The Quarantine folder is full.

B- The Move action has been disabled.

C- The Quarantine folder has not yet been scanned.

D- The Move action of Server Protect has already placed the infected file in the Quarantine folder.

Answer:

D

Question 5

What are two types of Alert Notification options available in Server Protect 5.x? (Choose two.)

Options:

A- Virus Alert

B- Standard Alert

C- Outbreak Alert

D- Real-Time Alert

E- SMNP Trap Alert

Answer:

B, C

Question 6

Question Type: **MultipleChoice**

When generating message text that notifies you when the virus-pattern file is out-of-date, your own text can include information about _____.

Options:

A- the virus-pattern file expiry

B- how effective the out-of-date file was

C- where to obtain a new virus-pattern file

D- where the virus-pattern file is located and how to update it

Answer:

A

Question 7

Question Type: MultipleChoice

How do you configure a NetWare server to issue SNMP trap alerts?

Options:

A- manually copy the TMSP.mib file to the BAIT folder

B- manually copy the TMSP.mib file to the Novell ManageWise directory

C- use the Management Console to copy the TMSP.mib file to the BAIT folder

D- use the Management Console to copy the TMSP.mib file to the Quarantine folder

Answer:

B
