Question 1

Question Type: MultipleChoice

What are two benefits of virtual networking? (Choose two.)

Options:

- A- Limited network infrastructure scalability
- B- Limited workload mobility
- C- Reduced provisioning time
- D- Increased complexity
- E- Increased network visibility

Answer:

C, E

Question 2

Question Type: MultipleChoice

A customer needs help detecting lateral threat movement on east-west network traffic across multi-cloud environments.

Which solution should the customer use?

Options:

A- VMware HCX

B- NSX SD-WAN

C- NSX Distributed IDS

D- NSX Intelligence

Answer:

C

Question 3

Question Type: MultipleChoice

Which component provides virtual switching capabilities in NSX-T Data Center?

Options:

- A- NVD
- B- VSS
- C- NVDS
- D- VDSv6

Answer:

D

Question 4

Question Type: MultipleChoice

Which three VMware products help secure the software-defined data center (SDDC)? (Choose three.)

Options:

- A- VMware NSX

B- VMware vSphere Replication

C- VMware Deep Security

D- VMware SecDevOps

E- VMware Carbon Black

F- VMware AppDefense

Answer:

A, C, E

Question 5

Question Type: MultipleChoice

A customer needs a solution to optimize East/West traffic while maintaining an overlay-based L3 communication.

Which NSX-T Data Center feature can the customer use to achieve this requirement?

Options:

- A- Forwarding Policies
- B- Layer 2 Bridging
- C- Tier-0 Gateways
- D- Tier-1 Gateways

Answer:

C

Question 6

Question Type: MultipleChoice

A software developer has recently deployed two web servers that need to communicate with each other to exchange information. A junior network administrator has been asked to connect these two virtual machines to an already existing segment in NSX called Web-Segment and verify that communication between these two VMs is possible. The two web servers are running in a vSphere environment managed by vCenter Server.

Which two steps need to be performed to complete this task? (Choose two.)

Options:

- A- Connect the VMs to the segment from the NSX UI
- B- Use the traced command to check connectivity between VMs
- C- Connect the VMs to the segment from inside the Guest OS
- D- Use the ping command to check connectivity between VMs
- E- Connect the VMs to the segment from the vSphere Client

Answer:

A, D

Question 7

Question Type: MultipleChoice

What does NSX-T provide to a telecom provider's network services related to network throughput?

Options:

- A- Higher performance
- B- Higher recoverability

C- Higher security

D- Higher availability

Answer:

D

Question 8

Question Type: MultipleChoice

Which vSphere feature protects virtual machines against a hardware failure?

Options:

A- vSphere Distributed Resource Scheduler

B- vSphere vMotion

C- vSphere Distributed Power Management

D- vSphere High Availability

Answer:

D

Question 9

Question Type: MultipleChoice

Which two network connection types can be enabled in ESXi? (Choose two.)

Options:

- A- Connecting VMware DRS services to the physical network
- B- Connecting hybrid services to the physical network
- C- Connecting virtual machines to the physical network and to each other
- D- Connecting VMkernel services to the physical network
- E- Connecting cluster services to the physical network and to each other

Answer:

C, D
