Question 1

Question Type: MultipleChoice

Which is true about PostClientFlow?

Options:

- A- PostClientFlow will only be executed if a payload is returned.
- B- The response is blocked until! the PostClientFlow policies are executed.
- C- PostClientFlow can only include MessageLogging policies.
- D- PostClientFlow can include any supported policy.

Answer:

C

Question 2

Question Type: MultipleChoice

A cloud customer wants to safeguard their APIs against a sudden increase in traffic. You need to calculate an allowable traffic rate of 100 transactions per second (TPS) What should you do?

Options:

- A- Use a default Spike Arrest policy setting the limit to 100 TPS
- B- Use a Quota enforcement policy set to limit throughput to 100 TPS
- C- Use a Spike Arrest policy setting the UseEffectiveCount parameter
- D- Keep a count of accesses in the back-end, rejecting queries when they exceed 100 TPS

Answer:

A

Question 3

Question Type: MultipleChoice

Which policies can be used to create or modify a request message for a service callout? Select all that are correct

Options:

- A- ServiceCallout
- B- AssignMessage
- C- RequestMessage
- D- Message Validation

Answer:

B

exams

Question 4

Question Type: MultipleChoice

An API product in Apigee can be used to

Options:

- A- restrict access to a set of APIs
- B- configure the quota limits for APIs
- C- restrict access to APIs in different environments
- D- You should recommend a design change that uses a Apigee microgateway in front of the backend APIs.

Answer:

A

P2P
exams

Question 5

Question Type: MultipleChoice

You are part of an API team working on a versioning strategy for a new API. Several members of the team disagree on how to indicate the version. According to Apigee recommended practices, what would you recommend to the team?

Options:

- A- Use the payload.
- B- Use a header version: vl.
- C- Use the URI/products/productid/vl
- D- Use the URI/v1/products/product id

Answer:

D

Question 6

Question Type: MultipleChoice

Which components of Edge used to configure HTTPS inbound communication?

Options:

- A- TLS Store
- B- Virtual Hosts
- C- Certificate Manager
- D- Keystores and Truststores

Answer:

D

Question 7

Question Type: MultipleChoice

Where can you use a Flow Callout policy? Select all that apply.

Choose 2 answers

Options:

- A- Anywhere in a ProxyEndpoint or TargetEndpoint except PostClientFlow
- B- In a Shared Flow
- C- Only in the Flow phase of ProxyEndpoint or TargetEndpoint

- D- Anywhere except another Shared Flow
- E- Only in ProxyEndpoint PreFlow or TargetEndpoint PostFlow

Answer:

E

Question 8

Question Type: MultipleChoice

Your project is growing, and there have been several instances of confusion about the naming of data fields. What should you do?

Options:

- A- Enforce a naming convention using a static code analysis tool.
- B- Ask developers to do more code reviews, and focus on the names of fields.
- C- Create a basic data dictionary that covers common use cases and rules for naming
- D- Create a unified data model that attempts to model all use cases for each object type

Answer:

C

Question 9

Question Type: MultipleChoice

When populating the Quota configuration for an API product, which statement is true?

Options:

- A- The Quota specified will automatically be enforced for any Developer App Keys assigned to the API product.
- B- After validating an API key or access token, flow variables are automatically populated with the Quota configuration for later use in a Quota policy
- C- Rate limiting will be enforced precise to the seconds level, even if you configure a per-minute or higher interval
- D- The Quota configuration specified on the API product enforces a global rate limit across all API proxies

Answer:

C

Question 10

Question Type: MultipleChoice

An API product in Apigee can be used to

Options:

- A- restrict access to a set of APIs
- B- configure the quota limits for APIs
- C- restrict access to APIs in different environments
- D- You should recommend a design change that uses a Apigee microgateway in front of the backend APIs.

Answer:

A

Question 11

Question Type: MultipleChoice

You are implementing Concurrent Rate Limit, Spike Arrest and Quota policies in your proxy. You want to make sure the simplest checks run first. Using the flow shown in the diagram, which order of operations should you follow?

Options:

- A- Concurrent Rate Limit > Spike Arrest > Quota
- B- Quota > Concurrent Rate Limit > Spike Arrest
- C- Spike Arrest > Quota > Concurrent Rate Limit

D- Quota > Spike Arrest > Concurrent Rate Limit

Answer:

B

Question 12

Question Type: MultipleChoice

What are all of the values typically set in a Raise Fault policy?

Options:

- A- Error Code, Reason Phrase, and Payload
- B- Status Code and Payload
- C- Status Code, Reason Phrase, and Payload
- D- Status Code, Error Code, and Payload
- E- Edge Microgateway-aware proxies should at least contain a quota or OAuth2 policy

Answer:

A

Question 13

Question Type: MultipleChoice

In Apigee Edge APIs, what is fault.name?

Options:

- A- An out-of-the-box variable populated by Edge when a policy fails
- B- Custom variable that you populate before you Raise Fault
- C- System errors that are only populated in script callouts
- D- Backend error names that are populated along with error code
- E- You should recommend a design change that uses a Apigee microgateway in front of the backend APIs.

Answer:

D
