Question 1

Question Type: MultipleChoice

What are the essential steps in backing up Hitachi Ops Center Protector itself? (Choose two)

Options:

A- Exporting configuration settings
B- Backing up all associated storage volumes
C- Storing backup data on a separate server
D- Ensuring RBAC settings are included in the backup

Answer:

A, C

Question 2

Question Type: MultipleChoice

Given data protection, What is meant by 'data redundancy'?

Options:

A- The unnecessary repetition of data within a database
B- The inclusion of extra data that allows for the correction of errors in stored or transmitted data
C- Storing multiple copies of data in different locations to prevent data loss
D- Using redundant data centers to manage data lifecycle

Answer:

C

Question 3

Question Type: MultipleChoice

What should be included in a comprehensive report generated by Hitachi Ops Center Protector?

Options:

A- Trends over time, such as resource usage and availability
B- Only data from the last 24 hours
C- Basic system status updates
D- Personalized user access logs

Answer:

A

Question 4

Question Type: MultipleChoice

What is a critical capability of Hitachi Ops Center Protector for enhancing HCP private cloud backups?

Options:

A- Real-time analytics of backup activities
B- On-the-fly data encryption
C- High availability configurations
D- Multi-cloud management interfaces

Answer:

B

Question 5

Question Type: MultipleChoice

What are the essential steps in backing up Hitachi Ops Center Protector itself? (Choose two)

Options:

A- Exporting configuration settings
B- Backing up all associated storage volumes
C- Storing backup data on a separate server
D- Ensuring RBAC settings are included in the backup

Answer:

A, C

Question 6

Question Type: MultipleChoice

What are the essential considerations when using the REST API in Hitachi Ops Center Protector? (Choose two)

Options:

A- Ensuring proper authentication mechanisms are in place
B- Understanding the system's network configuration
C- Regularly updating the API to the latest version
D- Securing API endpoints from unauthorized access

Answer:

A, D

Question 7

Question Type: MultipleChoice

What is the main function of Hitachi Ops Center Protector in the context of cloud backups?

Options:

A- To compress data before backup
B- To manage snapshot and replication tasks across cloud environments
C- To monitor cloud storage costs
D- To provide physical security for cloud storage

Answer:

B

Question 8

Question Type: MultipleChoice

The _____ layer in Hitachi Ops Center Protector is responsible for coordinating data protection processes across all components.

Options:

A- control
B- interface
C- data
D- service

Answer:

A

Question 9

Question Type: MultipleChoice

What is the main advantage of using REST API for Hitachi Ops Center Protector over traditional CLI methods?

Options:

A- REST API provides a more secure connection.
B- REST API can be accessed from anywhere in the network.
C- REST API operations can be easily scaled and automated.
D- REST API uses less bandwidth.

Answer:

C

Question 10

Question Type: MultipleChoice

LUNs (Logical Unit Numbers) are used in Hitachi Ops Center Protector to manage data encryption.

Options:

A- False
B- True

Answer:

A

Question 11

Question Type: MultipleChoice

When creating reports in Hitachi Ops Center Protector, which of the following options is available?

Options:

A- Real-time reporting only
B- Scheduled reporting
C- Manual report generation
D- Event-triggered reporting

Answer:

B

Question 12

Question Type: MultipleChoice

What role do host nodes play in file-based data protection using Hitachi Ops Center Protector?

Options:

A- They decrypt data on-the-fly during transfers
B- They serve as endpoints for data replication tasks
C- They monitor network traffic for security breaches
D- They compress files to reduce storage requirements

Answer:

B
