Question 1

Question Type: MultipleChoice

What is the function of the peer ignore command?

Options:

- A) Deletes a BGP peer
- B) Retains all configurations of the peer and maintains the BGP peer relationship with the peer, but does not receive the routes sent from the peer
- C) Retains all configurations of the peer and maintains the BGP peer relationship with the peer, but does not advertise routes to the peer
- D) Retains all configurations of the peer, interrupts the BGP peer relationship with the peer, and clears all related routing information

Answer:

D

Question 2

Question Type: MultipleChoice

Routers work at Layer 3 and use uRPF to verify the source IP address of data packets. Switches work at Layer 2 but can also verify the source IP address of data packets if uRPF is enabled.

Options:

A) TRUE

B) FALSE

Answer:

A

Question 3

Question Type: MultipleChoice

A switch is running the Rapid Spanning Tree Protocol (RSTP). Upon a topology change/ what happens to dynamic entries in the L2 forwarding table?

Options:

- A) Only entries behind the port where TC was received are removed.
- B) All entries are removed except for those behind edge ports and the port where TC was received.
- C) All entries are removed (purged).
- D) All entries are removed except for entries behind edge ports.
- E) The aging timer is set to 15 seconds, so idle entries age out.

Answer:

B

Question 4

Question Type: MultipleChoice

Which of the following statements are false about Weighted Round Robin (WRR)? (Multiple Choice)

Options:

- A) WRR is a congestion management technology.
- B) WRR ensures that all queues being serviced.

- C) WRR ensures important traffic being forwarded first.
- D) WRR prevents congestion on the network.
- E) WRR cannot be used on gigabit-ethernet interfaces.

Answer:

C, D

Question 5

Question Type: MultipleChoice

Which of the following statements about the BSR/RP mechanism are true? (Multiple Choice)

Options:

- A) A PIM-SM domain can have multiple C-BSRs, but only one elected BSR.
- B) An elected BSR can collect C-RP information by using the C-RP packets received.
- C) An elected BSR floods Bootstrap packets to advertise BSR information and C-RP information to all routers in a PIM-SM domain.
- D) A C-BSR can also collect C-RP information by using C-RP packets.

Answer:

A, B, C

Question 6

Question Type: MultipleChoice

Routers HW1 and HW2 are in the same LAN and both are running OSPF. Which multicast IP address will HW1 and HW2 use to send updates to each other? (Multiple Choice)

Options:

- A) 224.0.0.10
- B) 224.0.0.1
- C) 224.0.0.13
- D) 224.0.0.5
- E) 224.0.0.9
- F) 224.0.0.6

Answer:

D, F

Question 7

Question Type: MultipleChoice

When DLDP detects a unidirectional link on an interface, the default operations on Huawei devices include: DLDP switches to the interface to Disable state, generates a trap and sets the interface state to DLDP Down.

Options:

A) TRUE

B) FALSE

Answer:

A

Question 8

Question Type: MultipleChoice

In the HW IP multicast network where many sources are also receivers, what protocol is used to allow the use of the same shared tree for traffic from sources towards RP and from RP towards receivers?

Options:

- A) PIM Dense Mode (PIM DM)
- B) Multicast Open Shortest Path First (MOSPF)
- C) Distance Vector Multicast Routing Protocol (DVMRP)
- D) Bidirectional PIM
- E) PIM Sparse Mode (PIM SM)

Answer:

D
