## Question 1

---

**Question Type:** MultipleChoice

---

If the customer load cannot be power-off, what should be taken care when closing the maintenance bypass switch?

### Options:

---

- A- The maintenance bypass switch can also be closed in the inverter power supply mode
- B- Turn off the inverter, let the UPS be in bypass power supply mode and then close the maintenance bypass switch
- C- First perform EPO then close maintenance switch
- D- Close the maintenance switch first and then execute the EP

### Answer:

---

A, B, D

## Question 2

---

**Question Type:** MultipleChoice

---

The reason for using the EPO status interface in the parallel step of the UPS5000-E is ().

**Options:**

---

- A- Prevent electric shock and protect personal safety
- B- Power off the load to prevent damage to the load device
- C- Protect the battery from discharge
- D- Cut off the output and set the parallel parameters

**Answer:**

---

D

## Question 3

---

**Question Type: MultipleChoice**

---

In the process of disconnecting the battery pack switch, if there are multiple sets of batteries, first disconnect the main switch between the battery pack and the UPS, and then disconnect the switch of each battery pack

**Options:**

---

**A-** TRUE

**B-** FALSE

**Answer:**

---

A

## Question 4

---

**Question Type:** MultipleChoice

---

The cycle life of the battery is direct proportional to the depth of discharge

**Options:**

---

**A-** TRUE

**B-** FALSE

**Answer:**

---

B

## Question 5

---

**Question Type:** MultipleChoice

---

To balance the capacity loss caused by the self-discharge of the battery during the use of the battery, it is necessary to charge the battery continuously and for a long time at constant voltage, which is called ().

**Options:**

---

A- charging

B- self-discharge

C- balanced charging

D- charging test

**Answer:**

---

A

## Question 6

---

**Question Type:** MultipleChoice

---

The report functions of NetEco has a variety of presentation forms, including visualization of bar charts, pie charts, graphs, etc.

**Options:**

A- TRUE

B- FALSE

**Answer:**

A

## Question 7

---

**Question Type:** MultipleChoice

---

When the temperature detector or smoke detector in the FusionModule1000 generates an alarm, ( ) emits a continuous beeping sound to remind you to take measures as soon as possible to avoid a major accident.

**Options:**

---

- A- Electricity or voltage ratio setting error
- B- The corresponding voltage collection line is abnormal.
- C- Corresponding current transformer failure
- D- Intelligent power meter failure

**Answer:**

---

A, B, C, D

## Question 8

---

**Question Type:** MultipleChoice

---

Huawei NetCol5000-A line-level precision air conditioner mainly solves the hot issue of high-density data center

**Options:**

---

- A- TRUE

**B- FALSE**

**Answer:**

---

A

## Question 9

---

**Question Type: MultipleChoice**

---

Creating a camera on the NetEco, users need to obtain the IP address of the camera and ( ).

**Options:**

---

**A-** Camera pixel

**B-** Camera code

**C-** Camera installation position

**D-** Camera luminance

**Answer:**

---

C

## Question 10

---

**Question Type:** MultipleChoice

---

On the NetEco, users can create domain, such as parks, building and rooms.

**Options:**

---

**A-** TRUE

**B-** FALSE

**Answer:**

---

A

## Question 11

---

**Question Type:** MultipleChoice

---

After all the NetEco monitoring cables are connected, users need to check ( ).

**Options:**

---

- A- Power cables and signal cables are bound separately.
- B- Proper redundancy is reserved at connectors of signal cables.
- C- Signal cable connectors are intact.
- D- Proper redundancy is reserved at the turning point for signal cables.

**Answer:**

---

A, B, C, D

## Question 12

---

**Question Type:** MultipleChoice

---

On the NetEco, users can viewed detailed camera information such as the camera name, code, IP address.

**Options:**

---

A- TRUE

B- FALSE

**Answer:**

---

A
