Question 4

Question Type: MultipleChoice

In the absence of a header, the Domain ID of each OSPF process running on the router and the process ID of the process

Be consistent and can be modified under the process through the domain-id command

Options:

A- True

B- False

Answer:

B

Question 5

Question Type: MultipleChoice

The link status information between different S.4S processes of the routers around the Taiwan and Taiwan is considered to be sound insulation.

Options:

A- True

B- False

Answer:

A

Question 6

Question Type: MultipleChoice

Senior engineers with rich experience can quickly solve faults only by experience, with high efficiency.

Options:

A- True

B- False

Answer:

A

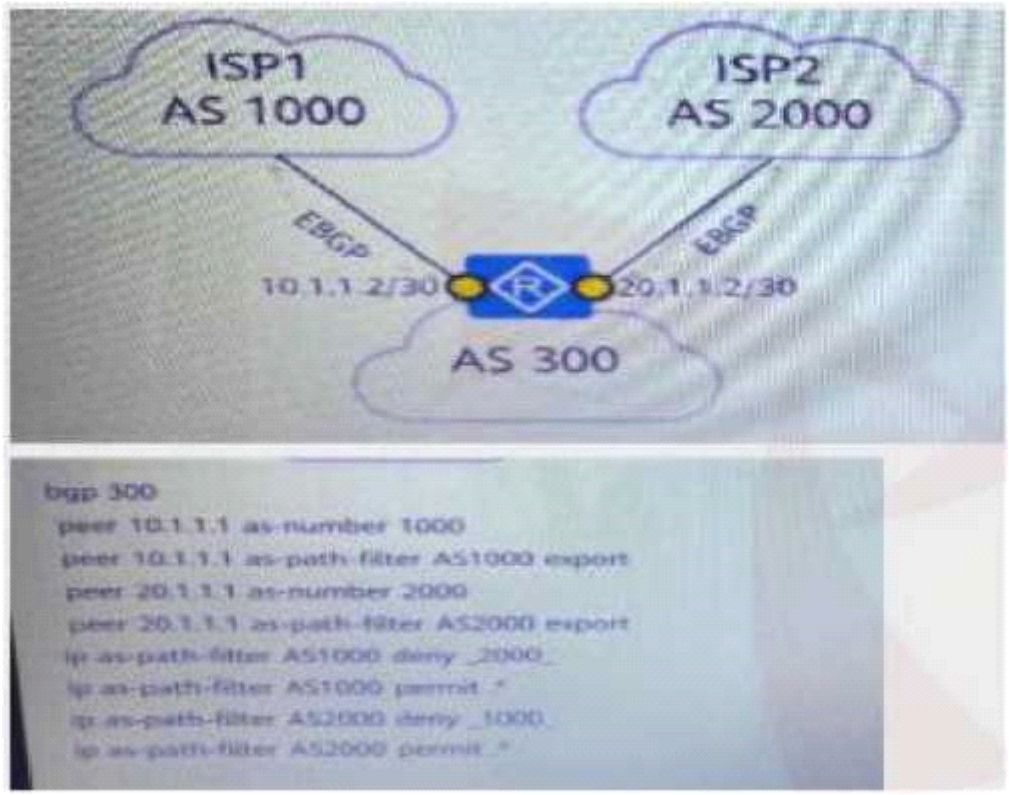
Question 7

Question Type: MultipleChoice

A company purchased private lines from two operators. In order to optimize the lines, the company used the 6GP protocol to learn from two

Route entries that operate off. However, after the enterprise found that this configuration, the traffic of the port route increased greatly, and the network engineering arrangement

After investigation, it was found that the traffic of the two operators was passed to each other through the enterprise egress router. Therefore, the enterprise intends to use the routing strategy so that the traffic of the packets of different carriers is no longer passed to each other. Is the configuration in the following figure correct?



Options:

A- True

B- False

Answer:

A

Question 8

Question Type: MultipleChoice
