## Question 1

---

**Question Type:** MultipleChoice

---

Word2vce is an open source tool for goodle, which can calculate the distance between words based on the set of input words.

**Options:**

---

**A-** TRUE

**B-** FALSE

**Answer:**

---

B

## Question 2

---

**Question Type:** MultipleChoice

---

Regarding the CBOW and Skip-Gram algorithms, is the following statement incorrect?

**Options:**

---

- A- Both CBOW and Skip-Gram can train vectors, but skip-Gram is faster than CBOW
- B- CBOW calculates the occurrence probability of a word based on n consecutive words in front of a word or n consecutive words before and after a word
- C- Both the CBOW model and the skip-gram model can be based on the Huffman tree
- D- Skip-Gram is to calculate the probability of several words before and after it according to a certain word

**Answer:**

---

A

## Question 3

---

**Question Type: MultipleChoice**

---

Which of the following is not a common method of text vectorization?

**Options:**

---

A- EM

B- CBOW

C- BDOW

D- DM

**Answer:**

---

A

## Question 4

---

**Question Type:** MultipleChoice

---

NNLM In the model, what is the activation function used by the network output layer?

**Options:**

---

A- Sigmoid

B- ReLU

C- Softmax

D- Tanh

**Answer:**

---

B

## Question 5

---

**Question Type:** MultipleChoice

---

Which of the following options does not belong to the three levels of natural language processing technology?

**Options:**

---

A- Semantic analysis

B- Speech analysis

C- Syntactic analysis

D- Lexical analysis

**Answer:**

---

B

## Question 6

---

**Question Type:** MultipleChoice

---

Which of the following options is not a method in the development of natural language processing?

**Options:**

---

- A- Methods based on deep learning
- B- Statistical-based methods
- C- Method based on recursion
- D- Rule-based approach

**Answer:**

---

B

## Question 7

---

**Question Type:** MultipleChoice

---

Natural language processing can be defined as a discipline that studies language issues in human-to-human communication and computational communication. Phenotypes of natural language processing Evaluation technology of various systems.

**Options:**

---

**A-** TRUE

**B-** FALSE

**Answer:**

---

A

## Question 8

---

**Question Type:** MultipleChoice

---

What is the difficulty of speech recognition?

**Options:**

---

- A- Dialect recognition
- B- Multiplayer scene recognition
- C- High noise field identification
- D- Recognition of far-field gram wind

**Answer:**

---

A, B, C, D

## Question 9

---

**Question Type:** MultipleChoice

---

What are the cutting-edge voice technologies?

**Options:**

---

- A- Adaptive technology
- B- Neural Network
- C- Language model

**D-** Quantum computing

**Answer:**

---

A, B, C

## Question 10

---

**Question Type: MultipleChoice**

---

Which of the following steps in the MFC extraction process?

**Options:**

---

**A-** Add window

**B-** Framing

**C-** Fourier transform

**D-** Cepstrum analysis

**Answer:**

---

A, B, C, D

## Question 11

---

**Question Type:** MultipleChoice

---

DNN model decoding acceleration methods include?

**Options:**

---

- A- Multi-frame DNN
- B- Parallel computing
- C- Low approximation
- D- Sparse network

**Answer:**

---

A, B, C, D

## Question 12

---

**Question Type: MultipleChoice**

---

What is not part of the DNN structure?

**Options:**

---

- A- Dropout
- B- Activation function
- C- Weight
- D- Hidden layer

**Answer:**

---

A
