# Question 1

**Question Type:** MultipleChoice

The following description of RAID is correct (multiple choice)

## Options:

**A-** RAID6 compared with RAID5, data recovery stronger, but the decline in literacy disk

**B-** when after a damaged disk, RAID5 the other disk still work, is unaffected disk I / O performance

**C-** RAID are to improve I / O performance of the storage system by concurrent read and write data on a plurality of disks

**D-** RAID storage space can be regarded as composed of two or more disks, the disk capacity available capacity for the sum

## Answer:

B, C

# Question 2

**Question Type:** MultipleChoice

The following description of distributed storage is correct

### Options:

**A-** The disks of the distributed storage come from the x86 architecture disk array.

**B-** The disk of the distributed storage comes from a personal PC

**C-** The disks of the distributed storage come from x86 architecture servers

**D-** The disks of the distributed storage come from the x86 architecture virtual machine

### Answer:

C

## Question 3

**Question Type:** **MultipleChoice**

In Huawei's FusionCompute, the system disk of the virtual machine cannot be unbound

### Options:

**A-** TRUE

**B-** FALSE

### Answer:

B

## Question 4

**Question Type:** **MultipleChoice**

The reason computing virtualization technology can improve application reliability is (multiple choice)

### Options:

**A-** The virtual machine hosting the application is decoupled from the hardware. You can use the virtual machine to migrate between multiple physical hosts.

**B-** Use computer virtualization technology to automatically allocate virtual machines that host applications to physical hosts with sufficient resources

**C-** Use computing virtualization technology to enable multiple applications to run on a physical host at the same time

**D-** Use computing virtualization technology to automatically adjust virtualization specificationsk

### Answer:

A, B

## Question 5

**Question Type:** MultipleChoice

Among the following options, the correct description of the characteristics of cloud computing on-demand self-service is

### Options:

**A-** The cloud computing service provider only needs to prepare all the services, and the remaining work is completely done by the user.

**B-** In the process of using cloud computing, users need to solve all problems by themselves

**C-** After the user has determined the cloud computing service he needs, he can complete the application for cloud computing resources alone.

**D-** Users do not need to explain to service providers when using cloud computing resources.

### Answer:

C

# Question 6

**Question Type:** MultipleChoice

The following options belong to open source virtualization technology:

### Options:

**A-** FusionCompute

**B-** vSphere

**C-** KVM

**D-** Hyper-v

### Answer:

C

# Question 7

**Question Type:** MultipleChoice

Which of the following options are KVM (multiple choice)

## Options:

**A-** Libvirt

**B-** Domain 0

**C-** QEMU

**D-** ESXI

## Answer:

A, C
