## Question 1

---

**Question Type:** MultipleChoice

---

Which of the following steps are involved in the migration process for Huawei FusionSphere services?

**Options:**

---

- A- Migration assessment
- B- Program design
- C- Migration implementation
- D- Migration and acceptance

**Answer:**

---

A, B, C, D

## Question 2

---

**Question Type:** MultipleChoice

---

In Huawei's cloud computing solutions, when creating distributed switches, which mode can switching types choose? (Multiple choice)

**Options:**

---

- A- Normal mode
- B- pass-through mode
- C- SRIOV mode
- D- SRIOV pass-through mode

**Answer:**

---

A, B, D

## Question 3

---

**Question Type: MultipleChoice**

---

Which of the following description about FusionStorage related content is correct? (Multiple choice)

### Options:

---

- A-** When the FusionStorage OSD receives Write IO from the VBS, the write IO cache in the SSD cache to complete the node write operation without waiting for be written to the sample disk.
- B-** FusionStorage supports server memory is used for read cache, NVDIMM, and SSD are used for write cache.
- C-** FusionStorage read cache using a hierarchical mechanism, the first layer is memory cache, memory cache using LRU mechanism cache data; the second layer is SSD cache, SSD cache using hot-read mechanism, the system will count each read data, and count hotspot access factor; when the threshold is reached, the system will automatically cache data to the SSD, and will move the data which is not accessed for a long time out of the SSD.
- D-** The cache and bandwidth of each server node in the FusionStorage cluster are evenly distributed across the various server nodes without the problem of limited bandwidth between the large number of disk- sharing computing devices and the storage devices in the independent storage system.

### Answer:

---

A, B, C, D

## Question 4

---

**Question Type:** MultipleChoice

---

Which of the following environments does FusionStorage support and provide block storage services?

(Multiple choice)

**Options:**

---

- A-** Support and provide block storage services for the FusionSphere environment.
- B-** Support and provide block storage services for VMware environments.
- C-** Support and provide block storage services for the KVM-based virtualized OpenStack cloud environment.
- D-** Support and provide block storage services for traditional non-virtualized scenarios, such as Oracle RAC traditional physical machine deployment.

**Answer:**

---

A, B, C, D

## Question 5

---

**Question Type: MultipleChoice**

---

Huawei FusionSphere OpenStack proceeds the commercial enhancement based on the OpenStack community version, which of the following services belong to Huawei's developed enhanced features? (Multiple choice)

**Options:**

---

- A- Cloud Start Service CBS
- B- Cloud Distribution Service CPS
- C- Graphical business management interface
- D- OpenStack Cascading Scheme

**Answer:**

---

A, B, C

## Question 6

---

**Question Type: MultipleChoice**

---

After users log in to the FusionAccess cloud desktop using TC, they find that they can not use a USB storage device. Which of the following methods can be used to quickly identify the fault location?

**Options:**

---

- A- Re-install the driver for the VM, in the VM Device Manager, check to see if there is a USB storage device inserted.

- B-** Check whether there are devices in the WI Floating Window Setup Bar, to determine if this is a TC-side or VM-side problem.
- C-** Install the driver on the TC side, and then check that the USB storage device is working properly.
- D-** Reconnect the USB storage device.

**Answer:**

---

B
