Question 1

Question Type: MultipleChoice

Active-Active Solution is implemented based on HyperMetro.

Options:

A- TRUE

B- FALSE

Answer:

A

Question 2

Question Type: MultipleChoice

Which of the following statements about the OceanStor Backup Solution are correct? (Multiple Choice)

Options:

- A-** A backup management system mainly consists of backup software and a backup management server.
- B-** The backup solution involves the central, branch, and remote DR sites.
- C-** Web-based management is not supported.
- D-** Backup nodes and backup storage media are separated from each other.

Answer:

A, B

Question 3

Question Type: MultipleChoice

Which function is not supported by a backup management node?

Options:

- A-** To maintain configuration information about all components (including clients, media agents, and backup devices)

- B-** To maintain and manage user permissions and software licenses
- C-** To manage all records of jobs and historical task records
- D-** To maintain index information of backup media
- E-** To provide web and GUI services

Answer:

D

Question 4

Question Type: MultipleChoice

What components does the backup system consist of? (Multiple Choice)

Options:

- A-** Backup management system
- B-** Backup media
- C-** Backup client

D- Backup software

Answer:

A, B, C

Question 5

Question Type: MultipleChoice

Is the Active-Active DR Solution feasible for the scenario where the bandwidth for the quorum server to the primary and secondary storage systems is 4 Mbit/s, RTT is not greater than 40 ms, and the packet loss rate is not greater than 1%?

Options:

A- No. The bandwidth cannot be smaller than 10 Mbit/s.

B- Yes. All conditions required for the solution are met.

C- No. The packet loss rate cannot be greater than 0.1%.

D- No. The latency cannot be larger than 20 ms.

Answer:

C

Question 6

Question Type: MultipleChoice

Which is the correct process for installing CommServe?

Options:

- A-** Install the .NET Framework. > Select a proper firewall configuration. > Install databases. > Configure DR paths.
- B-** Select a proper firewall configuration. > Install the .NET Framework. > Install databases. > Configure DR paths.
- C-** Install the .NET Framework. > Select a proper firewall configuration. > Configure DR paths. > Install databases.
- D-** Install the .NET Framework. > Install databases. > Select a proper firewall configuration. > Configure DR paths.

Answer:

A

Question 7

Question Type: MultipleChoice

In terms of configuring active/passive disaster recovery, which condition the LUNs on the primary and secondary storage systems must meet?

Options:

- A- A secondary LUN must have a larger size than or the same size as the primary LUN.
- B- A secondary LUN must have the same size and RAID level as the primary LUN.
- C- The secondary LUN only needs to have the same size as the primary LUN.
- D- The secondary storage system must be equipped with the same types of disks as the primary storage system, and a secondary LUN must have a larger size than or the same size as the primary LUN.

Answer:

C

Question 8

Question Type: MultipleChoice

Which of the following statements about client deduplication and media deduplication are true? (Multiple Choice)

Options:

- A-** Client deduplication is implemented as follows: At the source end, hash comparison is performed for data blocks to be transmitted. If a data block has been transmitted, only the corresponding hash index value will be transmitted.
- B-** In terms of media deduplication, in-line processing provides higher data transmission performance than post processing.
- C-** Media deduplication saves bandwidth resources and does not consume resources at the source end.
- D-** Client deduplication consumes resources at the source end but saves bandwidth resources.

Answer:

A, D

Question 9

Question Type: MultipleChoice

Which of the following components are required for the Huawei Active-Active DR Solution? (Multiple Choice)

Options:

- A- HyperMirror
- B- Quorum server
- C- Ultra Path
- D- HyperMetro

Answer:

B, C, D

Question 10

Question Type: MultipleChoice

An enterprise wants data backup to consume only a small amount of storage space and a minimal backup window. In this case, which backup type is most recommended?

Options:

- A- Full backup

- B-** Full backup + Cumulative incremental backup
- C-** Full backup + Differential incremental backup
- D-** Cumulative incremental backup + Differential incremental backup

Answer:

C

Question 11

Question Type: MultipleChoice

In data backup scenarios, which are characteristics of physical tape libraries? (Multiple Choice)

Options:

- A-** Data can be remotely stored in an offline manner for a long term.
- B-** The capacity scalability of a physical tape library is better than that of a disk system.
- C-** The backup and restoration performance is relatively low.
- D-** The management and maintenance costs are low.

Answer:

A, B, C
