Question 1

Question Type: MultipleChoice

The characteristics of cross-domain unified management of data backup include: (multiple choice)

Options:

- A- Client integration
- B- Centralized management
- C- Manual synchronization
- D- Fault isolation

Answer:

A, C, D

Question 2

Question Type: MultipleChoice

Which of the following statements about backup networking LAN-free and Server-free is correct?

Options:

- A- Server-free generates a copy during data backup, and the copy will be mounted to the backup server.
- B- Server-free networking can directly back up the backup data to the backup medium.
- C- LAN-free backup networking has no impact on production hosts.
- D- The path of LAN-free backup data stream is production storage -> backup server -> backup media.

Answer:

A

Question 3

Question Type: MultipleChoice

Regarding the characteristics of a single file system in Huawei distributed storage, Which option best option descriptions are correct ()

Options:

- A- When accessing a single file system, users need to pay attention to the specific data storage location
- B- Automatically create a unified file system when the system starts
- C- In a single file system, file collections are presented as directories
- D- The system provides a unified file system for accessing all available space

Answer:

A, B, C, D

Question 4

Question Type: MultipleChoice

Single choice Huawei Oceanstor 9000 adopts decentralized technology, the Wushan distributed file system has no performance

The bottleneck, as the number of nodes increases, storage capacity and computing power increase linearly, and ultimately provide users with linearly increasing bandwidth and concurrency

Options:

- A- True
- B- wrong

Answer:

A

Question 5

Question Type: MultipleChoice

Which one of the following options is incorrect for the description of the features of the Huawei Oceanstor 900 product?

Options:

- A- Oceanstor 9000 adopts a fully symmetrical logical architecture and business load balancing design, which can greatly improve the concurrent access capability of the system
- B- Oceanstor 9000 uses a global cache, so the data is saved in the cache
- C- Oceanstor 9000 does not support access to Oceanstor Devicemanager via HTTPS
- D- Oceanstor 900 can expand smoothly, and its capacity and performance support linear expansion.

Answer:

C

Question 6

Question Type: MultipleChoice

In the following statement about the features of Huawei SmartQuota, which options are correct to Select ()

Options:

- A- SmartQuota supports two storage types: block storage and file storage
- B- The main function of SmartQuota is to facilitate system administrators to manage the storage resources of resource users
- C- You can limit the resource usage of a single directory, user, and user group
- D- The resource usage can be reminded to resource users through alarms and events

Answer:

A, B, C, D

Question 7

Question Type: MultipleChoice

The built-in scripts of the disaster recovery management software OceanStor BCManagereplication are for Oracle, SQL Server

The application supports one-click failure recovery. Which of the following steps is not included in one-click failure recovery?

Options:

- A- The test application starts successfully
- B- Forcibly switch the replication relationship
- C- Start the disaster recovery application
- D- Mapping LUN

Answer:

D

Question 8

Question Type: MultipleChoice

(multiple choice) The value of Huawei OceanStor 9000 InfoTier is reflected in:

Options:

- A- It can ensure the system's response speed to hot data access and improve the storage performance of the entire system.
- B- Comprehensively utilize the cost advantages of different storage media to effectively reduce deployment and maintenance costs.
- C- Improve system storage performance and realize intelligent data management.
- D- Realize automatic file migration according to the corresponding relationship between file attributes and different storage devices, reducing the cost and complexity of manual management.

P2P
exams

Answer:

A, B, C, D

Question 9

Question Type: MultipleChoice

In the application scenario of sequential writing, for RAID10, the more single-Choose disks, the better.

Options:

A- True

B- False

Answer:

B
