Question 1

Question Type: MultipleChoice

Which object cannot Fusioninsight Manager manage?

Options:

- A- Spark
- B- Host OS
- C- YARN
- D- HDFS

Answer:

B

Question 2

Question Type: MultipleChoice

What is the correct statement in a Hadoop system for customers to upload files to the HDFS file system?

Options:

- A- Client's file data is passed to the DataNode through the NameNode
- B- The client divides the file into multiple blocks, and writes each DataNode in order according to the address information of the DataNode
- C- The client writes the entire file to each DataNode in order according to the address information of the DataNode, and then the DataNode divides the file into multiple blocks.
- D- The client only uploads data to a DataNode, and is then copied by the NameNode Block

Answer:

B

Question 3

Question Type: MultipleChoice

One of the following descriptions about the HDFS federation of the Hadoop distributed file system is correct? (Multiple choices)

Options:

- A- A Namespace uses a block pool to manage data blocks
- B- One namespace can use multiple block pools to manage data blocks
- C- The disk space of each block pool is physically shared and the logical space is isolated
- D- Support NameNode / Jamespace horizontal expansion

Answer:

A, C, D

Question 4

Question Type: MultipleChoice

A Hadoop manages cluster resources through the ResourceManager. What are its main functions? (Multiple choices)

Options:

- A- Cluster resource scheduling
- B- Application Management
- C- Cluster resource management
- D- Log Management

Answer:

A, B, C

Question 5

Question Type: MultipleChoice

What is the incorrect description of HBase's Region split process Split?

Options:

- A- The Split process did not really separate the files, only the reference file was created
- B- Split In order to reduce the size of data in a region, split a region into two regions
- C- The table will be suspended during split
- D- The region that was split during the split process will suspend service

Answer:

C

Question 6

Question Type: MultipleChoice

Which of the following OS versions are recommended for building a Fusioninsight V1R2C60 cluster? (Multiple choices)

Options:

- A- SUSE 11 SP1 / SP2 / SP3forAMD64 & Intel64
- B- CentOS-6
- C- RedNat-G.4-x86_64 (Positive Phosphorus Case)
- D- RedHat-6.5-x86_64 (positive answer)
- E- RedHat-6.7-x86_64 (positive code answer)
- F- Ubuntu6.3

Answer:

A, B, C, D, E

Question 7

Question Type: MultipleChoice

When deploying Kerberos and LDAP services for FusionInsightHD products, what is the following description correct? (Multiple choices)

Options:

- A- Before deploying Kerberos, you must deploy the LDAF service
- B- The LDAP service must be deployed on the same node as the Kerberos service
- C- Kerberos service and LDAP are deployed to the same node to facilitate data access and improve performance
- D- LDAP service can be shared across multiple clusters

Answer:

A, C

Question 8

Question Type: MultipleChoice

In the Fusioninsight HD system, if one of the loader points in the cluster is abnormal, and other services are not abnormal, the normal use of the loader function will not be affected.

Options:

- A- is correct
- B- False

Answer:

A
