- C- Create secondary index
- D- pre-scoreregion

Answer:

A, B, C

Question 5

Question Type: MultipleChoice

A project requires Internet access to a certain area? ?Save it, and search the full text of these Internet records to see if there is any? ?information, with

to prevent crime in the region.

In this scenario, which of the following options is the best?

Options:

A- existSolrCreate an index and save the data, and return all the data during full-text search.

B- existHBasestore data on theHBaseThe filtering characteristics of , satisfy fuzzy matching query.

C- When storing data, inSolrindex on theHBaseStore complete data? ?when, throughSolrFull-text search to obtain and record record key information, through the key information inHBasefor the full record.

Answer:

C

Question 6

Question Type: MultipleChoice

aboutFlumeThe characteristics of the collected data, which of the following descriptions are correct?

Options:

A- Supports distributed and streaming acquisition

B- with the help ofMapReducetask parallel collection

C- Only structured data can be collected

D- Trigger data collection with external timing tasks

Answer:

A

Question 7

Question Type: MultipleChoice

FusionInsight HDin, aboutOoze, which of the following operations can be performed on a suspended job? (many

select)

Options:

- A- kill
- B- run
- C- resume
- D- submit

Answer:

A, C

Question 8

Question Type: MultipleChoice

existFusionInsight HDmiddle,SparkBy defaultYARNAs a cluster resource management system.

Options:

- A- True
- B- False

Answer:

A

Question 9

Question Type: MultipleChoice

which come downRedisIs the command an atomic operation?

Options:

- A- INCR(increment the stored digital value by one)
- B- HINCRBY(for the hash tablekeydomain infieldvalue plus incrementincrement)
- C- LPUSH(for linked listpushoperate)
- D- HbaseSupport colleges and universities to read immediately, and can complete real-time analysis and command of the logistics situation through reasonable design.

Answer:

D

Question 10

Question Type: MultipleChoice

SparkThe calculation logic of the application will be parsed intoDAG, this parsing operation consists of which of the following function modules Finish? ?

Options:

- A- Client
- B- ApplicationMaster
- C- Executor
- D- Driver

Answer:

D

Question 11

Question Type: MultipleChoice

FusionInsight HD Which option best components can be used for data collection? (multiple choice)

Options:

- A- mouthFlume

- B- mouthLoader
- C- mouthHBase
- D- mouthMapReduce

Answer:

B, C
