Question 1

Question Type: MultipleChoice

Which part of the overall installation process does the "planning data" belong to?

Options:

- A- Preparation before installation
- B- Software installation and deployment
- C- Inspection after installation
- D- System configuration

Answer:

A

Question 2

Question Type: MultipleChoice

Which of the following options is not the process of expanding the physical cluster to the logical cluster?

Options:

- A- Node preprocessing
- B- Data redistribution
- C- Add nodes to the elastic cluster
- D- Capacity verification

Answer:

C

Question 3

Question Type: MultipleChoice

What is wrong about the logical cluster description?

Options:

- A-** GaussDB 200 only supports the physical expansion mode, and the human physical cluster is directly expanded to the logical cluster.
- B-** GaussDB 200 supports physical expansion mode, supports elastic cluster expansion to logical cluster
- C-** When the amount of data storage required by the business decreases, in order to avoid wasting resources, the logical cluster or elastic cluster can be scaled down
- D-** When the nodes of the logical cluster change or the logical cluster capacity is not redistributed, you need to manually perform data redistribution on the logical cluster.

Answer:

A

Question 4

Question Type: MultipleChoice

Which of the following are the basic functions of dual cluster disaster recovery?

Options:

- A- Master and standby cluster roles swap
- B- Display the current cluster role
- C- Show master cluster synchronization progress
- D- Cancel the standby cluster relationship

Answer:

A, B, C, D

Question 5

Question Type: MultipleChoice

When the host group is backed up, the main line and column files are backed up, and the log files may not be backed up

Options:

- A- True
- B- False

Answer:

B

Question 6

Question Type: MultipleChoice

For standby clusters, no services can be provided during recovery, and read-only services can be provided during non-recovery periods

Options:

A- True

B- False

Answer:

A

Question 7

Question Type: MultipleChoice

Which of the following modules guarantees high availability through active-standby replication?

Options:

A- CN

B- DN

C- GTM

D- CM Server

Answer:

B
