## Question 1

---

**Question Type:** MultipleChoice

---

GaussDB 200 implements logical cluster management to realize the division of a cluster into multiple small logical clusters in an existing MPPDB physical cluster to achieve isolation of computing and storage resources between logical clusters. Industry backup users cannot access data tables across clusters.

**Options:**

---

A- T

B- F

**Answer:**

---

B

## Question 2

---

**Question Type:** MultipleChoice

---

Which option is the normal tenant creation process? 633

**Options:**

---

- A- Add parent tenant
- B- Adding a sub-tenant
- C- Planning resource management
- D- Binding roles and tenants

**Answer:**

---

A, B, C, D

## Question 3

---

**Question Type:** MultipleChoice

---

Which of the following is the use scenario of the tenant function?

**Options:**

---

- A- When the database system load is high, resources exist between tasks
- B- Some tasks have higher priorities, ensuring that higher priority tasks can obtain sufficient resources to complete the operation.
- C- When multiple users use the database, achieve resource isolation
- D- Isolation of computing and storage resources

**Answer:**

---

A, B, C

## Question 4

---

**Question Type:** MultipleChoice

---

Which of the following is a resource that the subtenant can configure

**Options:**

---

- A- CPU limit
- B- CPU quota
- C- IO cap

**D-** Memory

**Answer:**

---

A, B, C, D

## Question 5

---

**Question Type:** MultipleChoice

---

Which of the following is not a tenant parameter configuration item

**Options:**

---

**A-** CPU quota

**B-** CPU priority

**C-** Memory

**D-** Permanent table space

**Answer:**

---

B

## Question 6

---

**Question Type:** MultipleChoice

---

What is the correct statement about resource quota among tenants?

### Options:

---

- A-** After 'CPU Quota' is set. The system will allocate CPU execution time to the current tenant in proportion to the 'CPU quota'
- B-** After the CPU quota parameter is set, the system will assign an exclusive number of CPU cores to the current tenant according to the 'CPU quota' ratio. Other tenants can use it flexibly when the load is high
- C-** 'CPU quota' and 'CPU quota' can take effect at the same time
- D-** The storage space size of the tenant persistent data table space corresponds to an actual physical storage space size, which is specified by the parent tenant. The total storage used by all child tenants cannot exceed the total storage specified by the parent tenant

### Answer:

---

D

## Question 7

---

**Question Type:** MultipleChoice

---

GaussDB 200 tenant can configure the operation permissions of database objects

**Options:**

---

A- T

B- F

**Answer:**

---

A
