Question 1

Question Type: MultipleChoice

SafeVideo+ features, the functions are

Options:

- A- Camera recordings installed at important points can be redundant as needed
- B- The recording of important time periods can be redundant on demand
- C- When part of the physical hard disk is damaged and the Raid group fails, the Raid group video is still readable
- D- When part of the physical hard disk is damaged and the Raid group fails, the Raid group can still write video

Answer:

A, B, C, D

Question 2

Question Type: MultipleChoice

Which descriptions of Huawei video surveillance platform VCN3000 are correct on the equipment parameters?

Options:

- A-** Support mixed insertion of SATA and SAS hard disks, hot-swappable hard disks and online replacement of failed hard disks; SAS channel interface performance 6Gbps:
- B-** Image storage adopts block storage to avoid disk fragmentation:
- C-** Supports LUN non-failure technology. When multiple hard disks are damaged, the recording data on the undamaged hard disks in the Raid group can still be read by the system.
- D-** A single device can simultaneously access video streams: 256 channels, forwarding: 512Mbps, storage: 512Mbps, video playback and download: 128Mbps.

Answer:

A, B, C, D

Question 3

Question Type: MultipleChoice

Which of the following protocols or specifications does Huawei video surveillance platform VCN3000 support?

Options:

A- ONVIF

B- SIP

C- clairvoyance

D- GB-T28181

Answer:

A, B, C, D

Question 4

Question Type: MultipleChoice

What is the triple cloudization of Huawei's VCN3000 platform?

Options:

- A- Cloud between different devices
- B- Cloud between different RAID groups inside the device
- C- Cloud between different hard drives in the same RAID group
- D- Cloud between different clients

Answer:

A, B, C

Question 5

Question Type: MultipleChoice

Some cases of Huawei Video Cloud: 80+ customers have been served by the Ministry of Public Security, provincial departments, prefectures and cities. Which ones can be visited ()

Options:

- A- Longgang, Shenzhen
- B- Qingdao

C- Guangzhou

D- Xiamen

Answer:

A, B, C, D

Question 6

Question Type: MultipleChoice

A video cloud in Guangdong realizes cross-domain deployment and precise strikes. Its core values are reflected in three views, namely ()

Options:

A- Comprehensive view: application-defined IPC, comprehensive and detailed

B- All sharing: the province's linkage, one point initiation, the whole network responds

C- Fully automatic: high computing power, multiple algorithms, second-level retrieval of hundreds of billions of images

D- Full intelligence: end-to-end artificial intelligence, replacing human eyes with machine vision

Answer:

A, B, C

Question 7

Question Type: MultipleChoice

The five levels of intelligence defined by ICAN are ()

Options:

- A-** L0 is not intelligent
- B-** L1 primary intelligence
- C-** L2 limited perceptual intelligence
- D-** L3 Omniscient Intelligence
- E-** L4 autonomous intelligence

Answer:

A, B, C, D, E

Question 8

Question Type: MultipleChoice

The three points of value of OS9000 storage at the central node ()

Options:

- A- OceanStor9000, mixed view storage, the fastest video cloud storage in the industry, 3 times the HK performance
- B- Large capacity, supporting hundreds of petabytes of storage
- C- Highly reliable, fully symmetrical architecture, any node failure, no data loss
- D- The cost is 1.3 times that of friends

Answer:

B, C
