Question 1

Question Type: MultipleChoice

In the GPON system, Huawei recommends that optical splitting levels do not exceed 2. Which of the following networking is incorrect?

Options:

A- Level-1 optical splitting 1:2, Level-2 optical splitting 1:16
B- Level-1 optical splitting 1:16, Level-2 optical splitting 1:16
C- Level-1 optical splitting 1:8, Level-2 optical splitting 1:8
D- Level-1 optical splitting 1:2, Level-2 optical splitting 1:8

Answer:

B

Question 2

Question Type: MultipleChoice

In the evolution of EPON to 10 G EPON, a smooth transition is achieved at the local level by adding WDM WDM modules, and ODNs coexist

Options:

A- True
B- False

Answer:

B

Question 3

Question Type: MultipleChoice

Huawei OLT supports device diagnosis based on service flows. Which of the following

statements is incorrect?

Options:

A- Only packet headers are captured for data packets, and entire packets are captured for protocol packets.
B- Service flow packet capturing is configured in the global configuration view.
C- The number or duration for captured packets can be specified.
D- You need to set the information about the backup server.

Answer:

D

Question 4

Question Type: MultipleChoice

In video services, if the VOD service is normal but the live service encounters a black screen, which of the following are possible causes?

Options:

A- PQ is used for downstream congestion management of an OLT.
B- DWRR is used for upstream congestion management of an OLT.
C- On the ONU, the VLAN of the VoD service is different from that of the live service. On the OLT, there is only one video service stream.
D- The traffic profile corresponding to the OLT upstream multicast service flow is set to a low priority.

Answer:

C

Question 5

Question Type: MultipleChoice

(Multiple choice) When the OLT main control board CPU is detected to be continuously elevated, the following possible causes are?

Options:

A- The user logged in illegally
B- Network loops
C- Cyber attacks
D- Rogue ONU

Answer:

B, C, D

Question 6

Question Type: MultipleChoice

Which option best multicast protocols is directly associated with the hosts? Specifically, routers running the protocol manage the joining and leaving of hosts in a multicast group and send multicast data to the hosts by querying the multicast forwarding table.

Options:

A- PIM-DM
B- MSDP
C- PIM-SM
D- IGMP

Answer:

D

Question 7

Question Type: MultipleChoice

On the U2000 network management, the oLT PON port LED is not green, indicating that the PON port is faulty.

Options:

A- wrong
B- Right

Answer:

A
