Question 1

Question Type: MultipleChoice

Regarding the LTE protocol architecture, which of the following statements are correct? (multiple choice)

Options:

A- The physical layer provides data transmission services to the upper layers, which can be accessed through the MAC sublayer and using the transmission channel
B- The role of the transmission channel is to describe how information is transmitted through the wireless interface
C- MAC provides different logical channels to the radio link control (RLC) sublayer of layer 2
D- The role of the logical channel is to characterize the type of message transmitted

Answer:

A, B, C, D

Question 2

Question Type: MultipleChoice

E-UTRAN to GERAN different system switching has five switching strategies: PS HO, CCO/NACC, SRVCC, redirection and fast redirection.

Options:

A- Yes
B- False

Answer:

A

Question 3

Question Type: MultipleChoice

Which of the following information cannot be carried by PUSCH?

Options:

A- Transport format
B- CQI
C- HARQ feedback
D- RRC signaling

Answer:

A

Question 4

Question Type: MultipleChoice

In the LTE system, which of the following criteria is used for cell selection?

Options:

A- Srxley >0
B- Squal >0
C- Srxlev> 0, and Squal> 0
D- Srxlev >0 or Squal >0

Answer:

C

Question 5

Question Type: MultipleChoice

Which signaling is triggered by the statistics of the successful RRC connection establishment?

Options:

A- RRC connection setup
B- RRC connection request
C- RRC connection setup complete
D- RRC connection reconfiguration complete

Answer:

C

Question 6

Question Type: MultipleChoice

Which layer of the LTE air interface performs the functions of encryption and integrity protection?

Options:

A- PDCP
B- RLC
C- MAC
D- PHY

Answer:

A

Question 7

Question Type: MultipleChoice

Which of the following options are steps in the DCI encoding process? (multiple choice)

Options:

A- Information unit multiplexing
B- CRC addition
C- Channel coding
D- Rate matching
E- Code block cascade

Answer:

A, B, C, D

Question 8

Question Type: MultipleChoice

In TD-LTE, which of the following protocol stacks have the highest rate?

Options:

A- Application layer rate
B- PDCH layer rate
C- MAC layer rate
D- Physical layer rate

Answer:

D

Question 9

Question Type: MultipleChoice

Which of the following are the functions of the RRC layer? (multiple choice)

Options:

A- Switch control
B- System message broadcast
C- Wireless resource management
D- Integrity protection

Answer:

A, B, C
