**Answer:**

---

C

## Question 5

---

**Question Type: MultipleChoice**

---

Establish a GRE tunnel between the two companies through the Internet Internet, the A corporate network port IP address is 192.168.0.1, Tunnel port IP address is 10.10.10.1, Loopback port IP address is 172.16.15.1, external network is 171.13.15.1. Will the Tunnel interface mode, source address is configured which one?

**Options:**

---

A- 192.168.0.1

B- 10.10.10.1

C- 172.16.15.1

D- 171.13.15.1

**Answer:**

---

D

## Question 6

---

**Question Type:** MultipleChoice

---

All Categories Access Control List support for IP access control quintuple

**Options:**

---

**A-** True

**B-** False

**Answer:**

---

B

## Question 7

---

**Question Type: MultipleChoice**

---

Use NAT technology, the data packets in the network layer information (IP header) for encryption to enhance the security of the data.

**Options:**

---

A- True
